Science fiction literature has gained immensely in critical respect and attention while maintaining a broad readership. However, despite the fact that it is a rapidly changing field, contemporary science fiction literature also maintains a strong sense of its connections to science fiction of the past, which makes a historical reference of this sort particularly valuable as a tool for understanding science fiction literature as it now exists and as it has evolved over the years. The *Historical Dictionary of Science Fiction in Literature* covers the history of science fiction in literature through a chronology, an introductory essay, and an extensive bibliography. The dictionary section has over 300 cross-referenced entries, including significant people, themes, critical issues, and the most significant genres that have formed science fiction literature. Wells and Jules Verne to the virtual worlds of William Gibson's *Neuromancer* and *The Matrix*, *Science Fiction: A Guide to the Perplexed* helps students navigate the often perplexing worlds of a perennially popular genre. Drawing on literature as well as examples from film and television, the book explores the different answers that criticism has offered to the vexed question: what is science fiction? Each chapter of the book includes case studies of key texts, annotated guides to further reading, and suggestions for class discussion to help students master the full range of contemporary critical approaches to the field, including the scientific, technological, and political contexts in which the genre has flourished. Ranging from an understanding of the genre through the stereotypes of 1930s pulps through more recent claims that we are living in a science fictional moment, this volume will provide a comprehensive overview of this diverse and fascinating genre.
