

I'm ready to work on <https://www.thebodyshop.com> in English using gpt-4o.

Search for top-engaged discussions and frequent questions about skincare on Reddit, focusing on user pain points and emerging trends. Then analyze my website's content to identify gaps and create a content proposal that aligns with genuine user needs while highlighting opportunities to enhance existing articles.

Used WordLift Reddit SEO Analysis API ~

Used WordLift Search API

Based on the Reddit discussions and the search results from your website, here's a content proposal focusing on addressing user pain points and emerging trends in skincare:

## Key Topics and User Questions from Reddit

1. **Inactive Moderation:** Concerns about lack of active moderation in skincare communities, leading to unaddressed questions and discussions.
2. **Cultural Skincare Practices:** Interest in Japanese and Asian skincare products and routines.
3. **Skin Concerns:** Users frequently discuss issues like acne, dryness, and the effects of over-cleansing.
4. **Product Recommendations:** Requests for reliable product recommendations tailored to specific skin concerns.

## Reddit Discussions Blueprint:

*Blueprints for Text Analytics Using Python* Jens Albrecht, Sidharth Ramachandran, Christian Winkler, 2020-12-04 Turning text into valuable information is essential for businesses looking to gain a competitive advantage. With recent improvements in natural language processing, NLP users now have many options for solving complex challenges. But it's not always clear which NLP tools or libraries would work for a business's needs or which techniques you should use and in what order. This practical book provides data scientists and developers with blueprints for best practice solutions to common tasks in text analytics and natural language processing. Authors Jens Albrecht, Sidharth Ramachandran and Christian Winkler provide real world case studies and detailed code examples in Python to help you get started quickly. Extract data from APIs and web pages. Prepare textual data for statistical analysis and machine learning. Use machine learning for classification, topic modeling and summarization. Explain AI models and classification results. Explore and visualize semantic similarities with word embeddings. Identify customer sentiment in product reviews. Create a knowledge graph based on named entities and their relations.

*The Routledge Handbook of Media Education Futures Post-Pandemic* Yonty Friesem, Usha Raman, Igor Kanižaj, Grace Y. Choi, 2022-09-13 This handbook showcases how educators and practitioners around the world adapted their routine media pedagogies to meet the challenges of the COVID 19 pandemic, which often led to significant social, economic, and cultural hardships. Combining an innovative mix of traditional chapters, autoethnography, case studies, and dialogue within an intercultural framework, the handbook focuses on the future of media education and provides a deeper understanding of the challenges and affordances of media education as we move forward. Topics range from fighting disinformation, how vulnerable communities coped with disadvantages using media, transforming educational TV or YouTube to reach larger audiences, supporting students' wellbeing through various online strategies, examining early childhood parents and media, mentoring using digital tools, reflecting on educators' intersectionality, on video platforms, youth-produced media to fight injustice, teaching remotely and providing low-tech solutions to address the digital divide, search for solutions collaboratively using social media, and many more. Offering a unique and broad multicultural perspective on how we can learn from the challenges of addressing varied pedagogical issues that have arisen in the context of the pandemic, this handbook will allow researchers, educators, practitioners, institution leaders, and graduate students to explore how media education evolved during 2020 and 2021 and how these experiences can shape the future direction of media education.

AI Blueprints Dr. Joshua Eckroth, 2018-12-31 The essential blueprints and workflow you need to build successful AI business applications. Key Features: Learn and master the essential blueprints to program AI for real world business applications. Gain insights into how modern AI and machine learning solve core business challenges. Acquire practical techniques and a workflow that can build AI applications using state of the art software libraries. Work with a practical code based strategy for creating successful AI solutions in your business. Book Description: AI Blueprints gives you a working framework and the

techniques to build your own successful AI business applications You ll learn across six business scenarios how AI can solve critical challenges with state of the art AI software libraries and a well thought out workflow Along the way you ll discover the practical techniques to build AI business applications from first design to full coding and deployment The AI blueprints in this book solve key business scenarios The first blueprint uses AI to find solutions for building plans for cloud computing that are on time and under budget The second blueprint involves an AI system that continuously monitors social media to gauge public feeling about a topic of interest such as self driving cars You ll learn how to approach AI business problems and apply blueprints that can ensure success The next AI scenario shows you how to approach the problem of creating a recommendation engine and monitoring how those recommendations perform The fourth blueprint shows you how to use deep learning to find your business logo in social media photos and assess how people interact with your products Learn the practical techniques involved and how to apply these blueprints intelligently The fifth blueprint is about how to best design a trending now section on your website much like the one we know from Twitter The sixth blueprint shows how to create helpful chatbots so that an AI system can understand customers questions and answer them with relevant responses This book continuously demonstrates a working framework and strategy for building AI business applications Along the way you ll also learn how to prepare for future advances in AI You ll gain a workflow and a toolbox of patterns and techniques so that you can create your own smart code What you will learnAn essential toolbox of blueprints and advanced techniques for building AI business applicationsHow to design and deploy AI applications that meet today s business needsA workflow from first design stages to practical code solutions in your next AI projectsSolutions for AI projects that involve social media analytics and recommendation enginesPractical projects and techniques for sentiment analysis and helpful chatbotsA blueprint for AI projects that recommend products based on customer purchasing habitsHow to prepare yourself for the next decade of AI and machine learning advancementsWho this book is for Programming AI Business Applications provides an introduction to AI with real world examples This book can be read and understood by programmers and students without requiring previous AI experience The projects in this book make use of Java and Python and several popular and state of the art opensource AI libraries     Without Their Permission Alexis Ohanian,2016-03-01 A WALL STREET JOURNAL
