Burke, 2010-01-01 This book is based on a really important timely and relevant idea to bring together sources on the self management of leadership development The book is important because almost all leadership development relies to a great degree on the leader's capability to manage his or her personal development It is timely because there is currently no single volume that covers the topic and it is relevant because leadership is such an extremely important issue for the success of our organizations countries and society in general The editors have done a thoroughly professional job in identifying top quality authors and combining their contributions into a very worthwhile volume Ivan Robertson University of Leeds UK Self Management and Leadership Development offers a unique perspective on how leaders and aspiring leaders can and should take personal responsibility for their own development This distinguished book is differentiated from other books on this topic with its view on the instrumental role played by individuals in managing their own development rather than depending on others such as their organization to guide them Expert scholars in the area of leadership emphasize the importance of self awareness as the critical starting point in the process Explicit recommendations are provided on how individuals can manage

their own self assessment as a starting point to their development The contributors present insights and practical recommendations on how individuals can actively self manage through a number of typical leadership challenges Business school faculty teaching electives in leadership and managers who engage in leadership development for themselves or others should not be without this important resource Consulting firms and training institutions offering leadership development programs and participants in MBA and executive development programs will also find it invaluable

*Assessing Emotional Intelligence* Peter Carblis, 2014-05-14 In this groundbreaking book the author advocates that many relational collapses are the result of ineptitude rather than ill will That is they are the result of a lack of skills rather than a lack of goodwill As this book puts it many of societys relational problems may be competency related This might be good news since competencies can be learned The purpose of this book is to take a careful look at how such competencies can be developed Beginning with the view that if such competencies can be learned they must first be defined and have standards set for them it asks the question Can competency standards be designed for soft skills It is argued that the answer is yes Locating itself in the workplace context where adults often spend most of their lives but relevant to life in general this book shows how theoretically sound competency standards can be developed for selected soft skills This is done by adapting a methodology used to specify workplace competency standards The book also notes a number of practical and ideological issues that must be considered at implementation This book shows how standards for three such skills have been developed and provided with a preliminary workplace validation The skills selected are related to interpersonal skills and are derived from the framework of emotional intelligence competencies popularised by Goleman This is an important book for those in business studies
