Furmston, Greg Tolhurst, 2016. The book comprehensively reviews all the classical rules governing contract formation, with extensive coverage of difficult areas such as certainty, conditional contracts, good faith negotiations, auctions, tenders, online contracting, and the assessment of conduct and silence in contract formation. It also discusses the efficacy problems and rules around modern contracting, in particular the use of heads of agreement, letters of intent, letters of comfort, and the methods of resolving a battle of the forms. In this second edition, a chapter has been added on consideration and estoppel. Although this work is based on English law, the authors draw upon decisions in other jurisdictions such as Australia, Canada, the United States, Singapore, and New Zealand, where these inform the development of principles in English law.

Part One then analyses in detail the basic notions of formation of contract, including the range of psychological elements and their means of expression. The author then goes on to describe and compare the function and determination of offer and acceptance in the four legal systems. Part Two analyses the mechanism of formation and import of a contract in respect of both offer and acceptance. The book has been extensively researched and includes references to Roman law and other modern legal systems. The work has been meticulously indexed and cross-referenced.

Col, 2014-09-01 Go Beyond the FAR. The guidance contained in the almost 2000 pages of the Federal Acquisition Regulation and the various agency supplements are just a part of the resources government acquisition professionals need to do their jobs effectively. Accessing and understanding case law is equally important to a thorough understanding of government contracting. Legal decisions explain the Government Accountability Office's and the courts views on how procurement statutes and regulations apply in a wide range of situations. Case law also gives potential bid protesters and agencies a way to gauge the likely outcome of a protest. Until now it has been difficult to find and understand the legal decisions that could be relevant to a particular situation. Key Case Law Rules for Government Contract Formation changes that by organizing and explaining the most important protest grounds in a readily accessible and comprehensible way. With an emphasis on more recent cases the book is organized around the key protest grounds such as pricing issues, allegations that the government wrongfully prevented competition or improper sealed bidding procedures. Bridging the gap of understanding between the legal and the contracting communities this book is a much needed addition to the essential resources for acquisition professionals.
