**Expressive Arts Therapy for Traumatized Children and Adolescents** Carmen Richardson, 2015-08-11 Expressive Arts Therapy for Traumatized Children and Adolescents is the book so many expressive arts and trauma therapists have been waiting for Not only does it lay out an organized thorough framework for applying varied expressive arts modalities it provides clear directions for the application of these modalities at different phases of treatment Both beginning and experienced clinicians and students will appreciate the thoughtful analyses of ways for introducing expressive arts to clients engaging clients with their art being present to the art that is created and working within a particular session structure that guides the treatment process Readers will also receive more specific learning regarding the process of using body focused and sensory based language and skills in the process of trauma treatment over time They ll pick up more than 60 priceless expressive arts assessment and treatment interventions that are sure to serve them well for years to come The appendices features these interventions as photocopiable handouts that will guide the therapist working with youth through each phase of treatment *Coalition Commentary*, 2007 *From Safety to Sense of Safety* Jenni Spannari, Liz Grant, Monica Worline, Anne Birgitta Pessi, Henrietta Grönlund, Birgitte Johansen, 2025-09-23 The sense of safety is an essential foundation for human flourishing and well being It is a basic human need grounded in the evolutionary history of the human species as a part of the ecosphere However social political and health related global challenges have eroded deeply not only safety but our sense of safety Sense of safety is an individual experience but it is deeply rooted in the social communal and societal frames Thus in research we need to look at the sense of safety understanding that the wider societal situation strongly consists of individual and grass roots level experiences All people notwithstanding their race or age or any other variable need to feel safe Sense of safety is a feeling of relative security a comprehensive yet subjective psychological experience It requires ongoing appraisal closely associated with a person s awareness and perception That is sense of safety is related to safety but never the same and it is always about emotions It is deeply social never just about an individual and should be studied as such Sense of safety is pivotal for individuals communities in societies Interdisciplinary research on sense of safety is scarce and often academically too shallow e g not defining sense of safety as in e g Zacharia et al 2021 Murakami et al 2017 nor even differentiating between safety and sense of safety e g in Zou Yu 2022 Research and mainstream media focus

mostly on the large scale picture of safety e g statistics trends in numbers and political reporting But what are the individual level experiences of sense of safety and sense of security today How are they culturally bound and to what extent more universal
