Understanding Public Debates Jens Martin Gurr, 2024-06-20 By historicizing and contextualizing them through readings of carefully selected literary texts literary studies can contribute to understanding and rationalizing key debates waged in many pluralist societies today whether on different conceptions of liberty identity politics historical commemoration challenges of globalization or responses to climate change *Understanding Public Debates* presents case studies including Milton s *Paradise Lost* P B Shelley s 1820 Reform essay Philip Roth s *The Human Stain* the songwriting of Neil Young and Edward Young s 1720s *Sea Odes* recent climate fiction as well as non literary conflict narratives Rather than mining texts for arguments for or against certain positions this book is interested in how texts stage these debates by means of multiple perspectives narrative situations or ambiguities By suggesting how educators might use literary texts as conversation starters for more rational debates the volume also contributes to Public Literary Studies Three important fields are here brought together 1 the study of societal debates and conflicts and the ways in which they challenge pluralist societies 2 explorations of the societal functions of literature and of non literary narratives and 3 discussions of the role and functions of literary studies The book ends with ten crisp theses on how literary studies can contribute to understanding and rationalizing such conflictive debates Science Fiction and Climate Change Andrew Milner, J. R. Burgmann, 2020 This is a timely comprehensive and thoroughly researched study of climate fiction from around the world including novels short stories films and other formats Informed by a sociological perspective it will be an invaluable resource for students and scholars looking to enter and expand the field of climate fiction studies *Climate Change* Mike Hulme, 2021-07-27 Written by a leading geographer of climate this book offers a unique guide to students and general readers alike for making sense of this profound far reaching and contested idea It presents climate change as an idea with a past a present and a future In ten carefully crafted chapters *Climate Change* offers a synoptic and inter disciplinary understanding of the idea of climate change from its varied historical and cultural origins to its construction more recently through scientific endeavour to the multiple ways in

which political social and cultural movements in today's world seek to make sense of and act upon it to the possible futures of climate however it may be governed and imagined The central claim of the book is that the full breadth and power of the idea of climate change can only be grasped from a vantage point that embraces the social sciences humanities and natural sciences This vantage point is what the book offers written from the perspective of a geographer whose career work on climate change has drawn across the full range of academic disciplines The book highlights the work of leading geographers in relation to climate change examples illustrations and case study boxes are drawn from different cultures around the world and questions are posed for use in class discussions The book is written as a student text suitable for disciplinary and interdisciplinary undergraduate and graduate courses that embrace climate change from within social science and humanities disciplines Science students studying climate change on interdisciplinary programmes will also benefit from reading it as too will the general reader looking for a fresh and distinctive account of climate change

Climate Fiction and Cultural Analysis Gregers Andersen, 2019-09-25 *Climate Fiction and Cultural Analysis* argues that the popularity of the term climate fiction has paradoxically exhausted the term's descriptive power and that it has developed into a black box containing all kinds of fictions which depict climatic events and has consequently lost its true significance Aware of the prospect of ecological collapse as well as our apparent inability to avert it we face geophysical changes of drastic proportions that severely challenge our ability to imagine the consequences This book argues that this crisis of imagination can be partly relieved by climate fiction which may help us comprehend the potential impact of the crisis we are facing Strictly assigning climate fiction to fictions that incorporate the climatological paradigm of anthropogenic global warming into their plots this book sets out to salvage the term's speculative quality It argues that climate fiction should be regarded as no less than a vital supplement to climate science because climate fiction makes visible and conceivable future modes of existence within worlds not only deemed likely by science but which are scientifically anticipated Focusing primarily on English and German language fictions *Climate Fiction and Cultural Analysis* shows how Western climate fiction sketches various affective and cognitive relations to the world in its utilization of a small number of recurring imaginaries or imagination forms This book will be of great interest to students and scholars of ecocriticism the environmental humanities and literary and culture studies more generally

Our Shared Storm Andrew Dana Hudson, 2022-04-05 Through speculative fiction five interlocking novelettes explore the possible realities of our climate future What is the future of our climate Given that our summers now regularly feature Arctic heat waves and wildfire blood skies polar vortex winters that reach all the way down to Texas and 100 year storms that hit every few months it may seem that catastrophe is a done deal As grim as things are however we still have options Combining fiction and nonfiction and employing speculative tools for scholarly purposes *Our Shared Storm* explores not just one potential climate future but five possible outcomes dependent upon our actions today Written by speculative fiction writer and sustainability researcher Andrew Dana Hudson *Our Shared Storm* features five

overlapping fictions to employ a futurist technique called scenarios thinking. Rather than try to predict how history will unfold, picking one out of many unpredictable and contingent branching paths, it instead creates a set of futures that represent major trends or counterposed possibilities based on a set of climate modeling scenarios known as the Shared Socioeconomic Pathways (SSPs). The setting is the year 2054 during the Conference of the Parties global climate negotiations at the COP in Buenos Aires, Argentina. Each story features a common cast of characters but with events unfolding differently for them and human society in each alternate universe. These five scenarios highlight the political, economic, and cultural possibilities of futures where investments in climate adaptation and mitigation promised today have been successfully completed, kicked down the road, or abandoned altogether. From harrowing to hopeful, these stories highlight the choices we must make to stabilize the planet. Our Shared Storm is an experiment in deploying practice-based research methods to explore the opportunities and challenges of using climate fiction to engage scientific and academic frameworks. [Saving the World One Word at a Time](#) Ellen Briana Szabo, 2015-06-16 Discover how writing fiction can make the world a better place. This book offers instruction, inspiration, and prompts for writing cli-fi speculative fiction that focuses primarily on the ways that climate change is transforming our world. Explore how plot, place, and character development can make climate change personal. By anticipating and elaborating on the future implications of climate change, writers of cli-fi use knowledge of science and climate to imagine and create apocalyptic or dystopian worlds with the goal of changing how humans think about inhabiting and interact with our planet. Place your writing at the forefront of efforts to reimagine the message and the messengers of climate change, taking the issue out of politics and into the realm of the personal. [The Routledge Handbook of Fiction and Belief](#) Alison James, Akihiro Kubo, Françoise Lavocat, 2023-12-22 The Routledge Handbook of Fiction and Belief offers a fresh reevaluation of the relationship between fiction and belief, surveying key debates and perspectives from a range of disciplines including narrative and cultural studies, science, religion, and politics. This volume draws on global cutting-edge research and theory to investigate the historically variable understandings of fictionality and allows readers to grasp the role of fictions in our understanding of the world. This interdisciplinary approach provides a thorough introduction to the fundamental themes of Theoretical and Philosophical Perspectives on Fiction, Fiction, Fact, and Science, Social Effects and Uses of Fiction, Fiction and Politics, Fiction and Religion, Questioning how fictions in fact shape, mediate, or distort our beliefs about the real world. Essays in this volume outline the state of theoretical debates from the perspectives of literary theory, philosophy, sociology, religious studies, history, and the cognitive sciences. It aims to take stock of the real or supposed effects that fiction has on the world and to offer a wide-reaching reflection on the implications of belief in fictions in the so-called post-truth era. [The Oxford History of the Novel in English](#) Cyrus R. K. Patell, Deborah Lindsay Williams, 2024 An overview of US fiction since 1940 that explores the history of literary forms, the history of narrative forms, the history of the book, the history of media, and the history of higher education in the United States. [Intermedial Ecocriticism](#) Jørgen Bruhn, Niklas Salmose, 2023-12-11
