together with accounts of their biology A large number of pictures graphs and distribution maps illustrate the text By largely
avoiding or at least explaining scientific terms and providing extensive references the book should be useful for both laymen
and scientists The quantitative information on some 200 fish taxa is derived from 72 000 stations fished by research vessels
during the period 1977 2013 The area covers the northwest European shelf from west of Ireland to the central Baltic Sea and
from Brittany to the Shetlands Although the surveys extend beyond the shelf edge only taxa reported at least once in waters
