**Windows User's Guide to DOS - Using the Command Line in Windows 2000 Professional** Carolyn Z. Gillay, Bette A. Peat, 2002 Carolyn Gillay and Bette Peat have teamed up again to write the Windows 2000 Professional version of their runaway bestseller Windows User's Guide to DOS. Like its predecessor this book is aimed at the student who has had little or no experience in working with a computer at the operating system level. It is suitable for a three credit 16 week semester length course. *FAA Certification of Light Aircraft* United States. Congress. House. Committee on Government Operations. Distance, Rating Systems and Enterprise Finance Franz Flögel, 2018-07-27 In response to the credit crunch during the global financial crisis of 2007-2008 many have called for the re-establishment of regional banks in the UK and elsewhere. In this context Germany's regional banking system with its more than 1 400 small and regional savings banks and cooperative banks is viewed as a role model in the financing of small and medium sized enterprises (SMEs). However, in line with the 'death of distance' debate, the universal application of ICT based scoring and rating systems potentially obviates the necessity for proximity to reduce information asymmetries between banks and SMEs, calling into question the key advantage of regional banks. Utilising novel ethnographic findings from full time participant observation and interviews this book presents intimate insights into regional savings banks and compares their SME lending practices with large nationwide operating commercial banks in Germany. The ethnographic insights are contextualised by a concise description of the three pillar German banking system covering bank regulation, structural and geographical developments and enterprise finance. Furthermore, the book advances an original theoretical approach that combines classical banking theories with insights from social studies of finance on the ontological foundation of new realism. Ethnographic findings reveal varying distances of credit granting depending on the rating results, i.e. large banks allocate considerable credit granting authority to local staff and therefore challenge the proximity advantages of regional banks. Nevertheless, by presenting case studies of lending to SMEs the book demonstrates the ability of regional banks to capitalise on proximity when screening and monitoring financially distressed SMEs and explains why the suggestion that ICT can substitute for proximity in SME lending has to be rejected. *The Institute Tie*, 1920. *The Saturday Review of Politics, Literature, Science and Art*, 1883. *Air Facts*, 1948. **Kings of**
