Chihuly : form from fire : Lowe Art Museum, University of Miami, Coral Gables, Florida, January 28 - March 28, 1993 : Tampa Museum of Art, Tampa, Florida, May 1 - August 21, 1993 : Museum of Arts and Sciences, Daytona Beach, Florida, September 11 - November 28, 1993... , 1993 *Fire* Dale Chihuly, 2006 From Baskets and

Seaform to Chandeliers and Towers this 176 page book features subsections dedicated to many of Chihuly's series including a dynamic pictorial chronology documenting the development and history of Chihuly's most popular glass series A companion to the popular Chihuly Form from Fire *Clearly Inspired* Karen S. Chambers, Tampa Museum of Art, 1999 For five thousand

years artisans have worked in glass to create forms that serve and delight But only recently have artists turned their hands and minds to this traditionally utilitarian and decorative material Clearly Inspired Contemporary Glass and Its Origins contrasts the work of contemporary glass artists with examples of earlier glass that have inspired them to rediscover or reinvent forgotten techniques Transforming an ancient craft into a contemporary art they honor the past while making visual statements that are very much of our time **The Origins of Creativity** Bruce Adolphe, 2001 The exploration of creativity

used to be confined to the domains of psychology and philosophy This has changed greatly in recent years with the dramatic advances of modern neuroscience and our greatly improved understanding of higher brain function This book examines the biology of the brain and creativity not only through psychology and philosophy but also with the input of art science and neurobiology for the first time bringing the discoveries of modern neurobiology to bear on the subject of creativity It addresses four themes central to our understanding of creativity the creative experience in art and science the mind's perception of patterns the biological basis of imagination and the influence of the environment of creative powers In this fascinating and interdisciplinary collection of essays painters and composers explore the creative processes in their arts a mathematician points out that computer generated fractal images are often perceived as art and evoke emotional reactions and modern neuroscience begins to explain the creator's experience and sees creative decision making as a function that is inseparable from emotion Not only are these essays fascinating within themselves but they interact and collide in such a way that suddenly mathematics is bringing forth art and science becomes an argument for unexplainable emotions Many questions and theories are explored in these pages What is the Eureka experience how do the brain and mind make creative decisions and what is the role of emotion In the end *The Origins of Creativity* will explore with you the possibility of creativity being a genetically encoded product of the evolution of the brain favored by natural selection but influenced by the environment of each individual as it unifies traditional views on creativity with today's new sciences of the mind *Water*
