Cli Fi Novel Global Trend

Jeffrey Cohen,Stephanie Foote

Cli Fi Novel Global Trend:

Sci-Fi Reader Trends Emily James, AI, 2025-02-19 Sci Fi Reader Trends explores the curious paradox of science fiction a genre with often modest sales that yields significant cultural influence. This book dives into how sci fi's futuristic themes, vibrant fan culture, and complex sales data interplay to shape our world. Delving into the genre's ability to act as a speculative laboratory, it examines how science fiction anticipates technological innovation and critiques social structures impacting fields far beyond literature. Did you know that science fiction conventions serve as vital hubs for both creativity and community, showcasing the deep engagement of its fans? The book navigates the history of science fiction from utopian beginnings to cyberpunk futures while also exploring the sociological implications of its fandom. It reveals that the cultural impact of science fiction outweighs its commercial success. Each section of the book offers a unique perspective, beginning with an introduction to core concepts and historical relevance, then examining futuristic themes, fan culture, and sales data. The analysis then culminates in offering insight into possible future directions for the constantly evolving genre.

Climate Fiction and Cultural Analysis Gregers Andersen, 2019-09-25 Climate Fiction and Cultural Analysis argues that the popularity of the term climate fiction has paradoxically exhausted the term's descriptive power and that it has developed into a black box containing all kinds of fictions which depict climatic events and has consequently lost its true significance. Aware of the prospect of ecological collapse as well as our apparent inability to avert it, we face geophysical changes of drastic proportions that severely challenge our ability to imagine the consequences. This book argues that this crisis of imagination can be partly relieved by climate fiction which may help us comprehend the potential impact of the crisis we are facing. Strictly assigning climate fiction to fictions that incorporate the climatological paradigm of anthropogenic global warming into their plots, this book sets out to salvage the term's speculative quality. It argues that climate fiction should be regarded as no less than a vital supplement to climate science because climate fiction makes visible and conceivable future modes of existence within worlds not only deemed likely by science but which are scientifically anticipated. Focusing primarily on English and German language fictions, Climate Fiction and Cultural Analysis shows how Western climate fiction sketches various affective and cognitive relations to the world in its utilization of a small number of recurring imaginaries or imagination forms. This book will be of great interest to students and scholars of ecocriticism, the environmental humanities, and literary and culture studies more generally.

The Cambridge Companion to Environmental Humanities Jeffrey Cohen, Stephanie Foote, 2021-09-02 Offers a comprehensive introduction to the environmental humanities. It addresses the 21st century recognition of an environmental crisis.

Teaching the Literature of Climate Change Debra J. Rosenthal, 2024-04-26 Over the past several decades, writers such as Margaret Atwood, Paolo Bacigalupi, Octavia E. Butler, and Kathy Jetner have explored climate change through literature, reflecting current anxieties about humans' impact on the planet. Emphasizing the importance of interdisciplinarity, this volume embraces literature as a means to cultivate students' understanding of the

ongoing climate crisis ethics in times of disaster and the intrinsic intersectionality of environmental issues Contributors discuss speculative climate futures the Anthropocene postcolonialism climate anxiety and the usefulness of storytelling in engaging with catastrophe The essays offer approaches to teaching interdisciplinary and cross listed courses including strategies for team teaching across disciplines and for building connections between humanities majors and STEM majors The volume concludes with essays that explore ways to address grief and to contemplate a hopeful future in the face of apocalyptic predictions

[Negotiating Waters: Seas, Oceans, and Passageways in the Colonial and Postcolonial Anglophone World](#) André Dodeman, Nancy Pedri, 2020-01-31

This book examines how seas oceans and passageways have shaped and reshaped cultural identities spurred stories of reunion and separation and redefined entire nations It explores how entire communities have crossed seas and oceans voluntarily or not to settle in foreign lands and undergone identity cultural and literary transformations It also explores how these crossings are represented The book thus contributes to oceanic studies a field of study that asks how the seas and oceans have and continue to affect political narratives of exploration cartography international maritime law identity insularity and literary issues survival narratives fishing stories Divided into three sections Negotiating Waters explores the management the crossings and the re imaginings of the seas and oceans that played such an important role in the configuration of the colonial and postcolonial world and imagination In their careful considerations of how water figures prominently in maps travel journals diaries letters and literary narratives from the 17th century onwards the three thematic sections come together to shed light on how water in all of its shapes and forms has marked lands nations and identities They thus offer readers from different disciplines and with different colonial and postcolonial interests the possibility to investigate and discover new approaches to maritime spaces By advancing views on how seas and oceans exert power through representation Negotiating Waters engages in important critical work in an age of rising concern about maritime environments

[Eco-Literature and Environmental Advocacy](#) Nasser Dasht Peyma, 2025-05-16

This book offers a comprehensive exploration of the power of eco literature to inspire environmental activism and ethical stewardship It uniquely blends literary analysis environmental advocacy and interdisciplinary perspectives to showcase how literature serves as a catalyst for global change By integrating poetry visual arts and storytelling the book provides readers with a unique multidimensional approach to understanding the environmental crisis It stands out for its global and cultural scope drawing on Indigenous narratives and cross cultural perspectives It weaves together the works of eco literary pioneers like Thoreau Muir and Leopold with contemporary authors such as Amitav Ghosh and Margaret Atwood The book's case studies offer practical insights into how eco literature has influenced policy and activism making it both an intellectual resource and a guide for real world impact Through practical case studies it offers insights into how eco literature influences policy and activism making it an essential resource for scholars activists and students It serves as a bridge between academic theory and practical application A valuable book for those interested in the intersection of literature culture and environmental

justice providing the tools needed to foster a more sustainable and ethical world

Contemporary Perspectives on Ecofeminism Mary Phillips,Nick Rumens,2015-11-19 Why is ecofeminism still needed to address the environmental emergencies and challenges of our times Ecofeminism has a chequered history in terms of its popularity and its perceived value in conceptualizing the relationship between gender and nature as well as feeding forms of activism that aim to confront the environmental challenges of the moment This book provides a much needed comprehensive overview of the relevance and value of using eco feminist theories It gives a broad coverage of traditional and emerging eco feminist theories and explores across a range of chapters their various contributions and uniquely spans various strands of ecofeminist thinking The origins of influential eco feminist theories are discussed including key themes and some of its leading figures contributors include Erika Cudworth Greta Gaard Trish Glazebrook and Niamh Moore and outlines its influence on how scholars might come to a more generative understanding of the natural environment The book examines eco feminism s potential contribution for advancing current discussions and research on the relationships between the humans and more than humans that share our world This timely volume makes a distinctive scholarly contribution and is a valuable resources for students and academics in the fields of environmentalism political ecology sustainability and nature resource management
