**Capitalism** Bruce R. Scott, 2011-10-02 Two systems of governance capitalism and democracy prevail in the world today Operating simultaneously in partially distinct domains these systems rely on indirect governance through regulated competition to coordinate actors inevitably these systems influence and transform each other This book rejects the simple equation of capitalism with markets in favor of a three level system a model which recognizes that markets are administered by regulators through institutions and governed by a political authority with the power to regulate behavior punish

transgressors and redesign institutions This system's emergence required the sovereign to relinquish some power in order to release the energies of economic actors Rather than spreading through an unguided natural process like trade capitalism emerged where competitive pressures forced political authorities to take risks in order to achieve increased revenues by permitting markets for land labor and capital

**Capitalism's Crises** Vishwas Satgar, 2015-10-01 The contributors to this volume draw on a non dogmatic Marxist approach to explain the systemic and conjunctural dynamics of crisis inherent in global capitalism Their analysis asks what is historically specific to capitalism's crises while avoiding catastrophic or defeatist claims At the same time the volume situates left agency within actual patterns of resistance and class struggle to clarify the potential for transformative change The cycle of resistance strengthened by the World Social Forum and transnational activism is now punctuated by the experience of the Arab Spring the agency of anti systemic movements left think tanks the

Occupy Wall Street Movement labour unions left parties in Europe such as Syriza and Podemos and peoples budgeting in Kerala India On the down side we are witnessing the waning of the Workers Party in Brazil and serious challenges for South Africa s once powerful labour movement and still formative social justice activism All these developments are assessed in this volume This is the second volume in the Democratic Marxism series It elaborates on crucial themes introduced in the first volume Marxism in the 21st Century Crisis Critique and Struggle edited by Michelle Williams and Vishwas Satgar

Discourses of Neoliberalism in Singapore's Higher Education Context Marissa K. L. E,2022-11-30 E explores using textual words and visual image data from the corporate newsletters of two prominent Asian universities how particular discourses and their associated discursive representations of neoliberal logic and subjectivity occur in higher education In particular she looks at the expression of both institutional priorities and state imperatives that lend themselves to a complementarity built upon two contradictory perspectives individualism and communitarianism She argues that the ever increasing demand for and utility of higher education in neoliberal society means that it no longer functions merely to provide knowledge and skills but has implications for society the individual and the state with regard to their ways of thinking doing and being Contributing to a growing corpus of literature on how higher education around the world is being shaped by neoliberal policies E s research is based on work done in the city state of Singapore a less well represented context in current literature While both higher education institutions possess significantly different institutional identities and backgrounds the alignment of their varied representations of neoliberal logic and subjectivity with state sanctioned imperatives that indirectly impose demands and constraints shows how neoliberalism as ideology adapts to the socio political socio cultural and socio economic dimensions that make up the Singapore context The discursive representations of context dependent neoliberal logics and subjectivity are discussed in terms of their ideological implications focusing primarily on the complementarity between seemingly contradictory ideological positions E s work uses an innovative framework that integrates aspects of Discourse Theory with Critical Discourse Analysis and demonstrates the use of this framework through empirical linguistic and image analysis Appealing to academics and graduate students in linguistics especially those with an interest in critical multimodal discourse analysis audiences from the domains of higher education research critical geography sociology and political science will also find this a useful book

### Cultural Context

Rachel L. Mathers,Claudia R. Williamson,2011 Does capitalism perform better when embedded in certain cultures Given the wide range of economic outcomes we address potential causes for the effectiveness or ineffectiveness of institutional constraints This paper argues that culture matters for the success of capitalist institutions specifically economic freedom We claim that different cultures may raise or lower the productivity of economic institutions by either constraining or supporting these rules We analyze this relationship empirically by examining how the interaction between economic freedom and culture affects economic growth Our results suggest that culture does indeed enhance the effectiveness of capitalism and its subsequent impact on growth

### *Capitalisms and Capitalism in the*

*Twenty-First Century* Glenn Morgan,Richard Whitley,2012-04-26 The early twenty first century is witnessing both an increasing internationalization of many markets firms and regulatory institutions and a reinforcement of the key role of nation states in managing economic development financial crises and market upheavals in many OECD and developing economies Drawing on a variety of interdisciplinary perspectives from leading US and European scholars this book analyses how capitalism and national capitalisms are changing in this context It focuses on the economic rise of new countries such as the BRICs the increasing influence of regional organizations such as the EU and NAFTA and new forms of private and public international regulation It also considers how states are adapting their economic policies and processes in this new environment and the consequences of these adaptations for inequality and risk within different societies These changes are linked to how firms are developing new strategies for organizing global value chains and the application of scientific knowledge to the commercialization of products in contexts where financial markets are becoming more uncertain and crisis

prone and where different groups are making new demands for more effective forms of corporate governance and corporate social responsibility Drawing on examples from Europe North and Latin America and Asia it illustrates the complex ways in which different forms of national capitalism are adapting and changing their institutions in response to international financial markets the global financial crisis the development of cross border value chains and expansion of multinational firms

**Encyclopedia of New Populism and Responses in the 21st Century** Joseph Chacko Chennattuserry, Madhumati Deshpande, Paul Hong, 2024-12-02 This book mainly seeks to explain define and update the recurring forms of populism in the 21st century Examples used in this Introduction are limited to English speaking countries But populism's existent expressions are ecumenically global Like any long lasting perennial organism it is sturdy and comes in a variety of forms adaptable to environmental changes In political or cultural terms its expression has been neither exclusively left center nor right Populism contains multitudes dates back centuries before it was identified with its modern name Populism has become a hot button issue in the recent times The UK's Sunday heavy The Guardian published about 300 articles in 1998 that used the term populism or populist and by 2016 its use had skyrocketed to over 2 000 And growing Probably the single greatest catalyst to date that injected populism into the world's Internet common discourse that infused it into journalism right left and center and awakened populist political activism was the Great Recession of 2007 08 and the subsequent global deprivations it engendered In today's world populism promises to remain and renew its intensity due to the covid 19 pandemic's deleterious effects on most nations middle and low income groups specially minorities These are some reasons among many why it is time for populism to be relocated identified and given refreshed 21st understandings It has a shifting nature among people events causes that constantly demands fresh studies It is a social and cultural phenomenon both universal and particular In our 21st century world it is a product of our shared cultures and each our own exceptional deep culture This Encyclopedia is unique in its composition as it includes all the major disciplines of Social Sciences and thus will be a one stop source of nine different disciplines looking at new populism

*Privatization in Turkey* Ahmet Zaifer, 2022-06-27 In *Privatization in Turkey* Power Bloc Capital Accumulation and State Ahmet Zaifer offers a rare look on privatization in Turkey that involves all three historical periods of Turkish privatization process 1980s and 1990s 2000s and 2010s and covers different forms of privatization from divestiture to public private partnership Benefiting from theoretically informed qualitative research spanning nearly a decade that has involved several interviews with key informant groups extensive review of newspaper articles and detailed analysis of annual reports of businesses Ahmet Zaifer convincingly proves that the acceleration of privatization in Turkey has not only provided advantages to so called favourable capital groups and the government elites but also consolidated the position of Capital in General at the expense of labouring popular classes and the natural environment of the entire country

**The Triumph of Capitalism** Robert A. Degen, 2011-12-31 Today there is widespread recognition that capitalism is the socioeconomic system of choice This volume perhaps the best

single volume assessment of this economic model and how it emerged contributes to the understanding of the historic role of capitalism. After reviewing the gestation of the system it explains the emergence of full blown capitalism in the eighteenth century taking it into the nineteenth and its link to the industrial revolution. The primary focus however is on the twentieth century in which capitalism faced and met challenges due to world wars and depression with the aid of interventionist policies notably Keynesian economics and the welfare state. But the failure of the postwar policy consensus to cope with the twin problems of inflation and slow economic growth led to a resurgence of greater reliance on unalloyed capitalism. Capitalist values so permeate modern culture in America that to question them seems like heresy. In 1989 the economist Robert L Heilbroner who had been a perceptive student of capitalism and socialism for decades proclaimed *The Triumph of Capitalism* arguing that the contest of economic systems was over and the victory of capitalism was unambiguous. Fifteen years later C Fred Bergsten Director of the Institute for International Economics reinforced this view. The U S model of capitalism and globalization dominates thinking around the world. Writer Russell Baker dismayed by perceived degrading effects of market obsessed management on journalism observed that belief in the virtue of maximized profits has acquired something like sanctity in American life. An appreciation of economic and social history and the accompanying clash of ideas is helpful in providing a context in which ongoing challenges may be evaluated. It is important to know that what is understood to be capitalism has changed significantly over time. The purpose of this book is to provide such context. Written by an economist but accessible to a general public this book is a wide ranging assessment of today's dominant economic system and its historical development.

*Leadership in Context* Mark N. Wexler, 2006. Leaders are made not born. Mark Wexler argues and they cannot be understood in a vacuum. There is no simple answer as to why certain people select one leader over others. Those who look for a master story within capitalism to encapsulate the effective leader are he asserts caught and blinded within the headlights of a particular worldview. Rather leaders can be understood and evaluated within the cognitive lens of four distinct and competing worldviews entrepreneurial regulatory communitarian and network. Exploring the manner in which leaders make and remake themselves in the midst of a changing world the author shows how they must put together a composite of the skills called for in the four faces of capitalism. He illustrates how and why local leaders develop skills within a worldview and how cosmopolitan leaders by engaging in reflective practice cross over into other worldviews and reinvent themselves. An accessible interdisciplinary study of a fascinating subject this volume will appeal to scholars and students of leadership as well as to practising leaders politicians and executives.

**Understanding the Vehicles of Capitalist Hegemony in Latin America** Daniel Felipe López Pérez, 2025-12-08

In recent decades Latin America has grappled with crises conflicts and inherent contradictions deeply rooted in the capitalist fabric of social relations. In his groundbreaking research author Daniel Felipe López Pérez delves into the historical foundations of enduring capitalist hegemonies across the

region *Industrial and labor relations review*, 1954 Locating Capitalism in Time and Space David Nugent, 2002 The last several decades have witnessed major restructurings economic political and cultural in the international arena The depth and scope of these changes have prompted anthropologists to rethink many of their most basic assumptions to problematize issues that have long gone unexamined and to grapple with new and unique problems Doing so has left the discipline profoundly unsettled Existing standards of scholarship and research methodologies have come under attack key conceptual categories have been called into question and truths once considered secure have been subjected to severe scrutiny and even ridicule Seizing upon the opportunity afforded by the contemporary conjuncture of disciplinary crisis and redefinition this book raises questions about two interrelated aspects of historical process and academic production The volume contributes to ongoing debates about the degree to which the developments of recent decades represent the advent of a new historical era a rupture with the past that requires new conceptualizations and logics in order to be understood In confronting this question the contributors to this volume have assembled a range of materials that place the present period of reconstruction in the context of a broader history and geography of other related restructurings Locating Capitalism in Time and Space also raises questions about the degree to which the scholarship of recent decades represents a qualitative break with that of the past At issue here is whether one understands the history of academic production as a linear process of intellectual growth punctuated by major breakthroughs in understanding or as a political process structured by the same kinds of inequalities and struggles that characterize the social worlds that are the object of anthropological analysis *Markets in their Place* Russell Prince, Matthew Henry, Carolyn Morris, Aisling Gallagher, Stephen FitzHerbert, 2021-07-27 Markets are usually discussed in abstract terms as an economic organizing principle a generalized alternative to government planning or even as powerful actors in their own right able to shape local and national economic destinies But markets are not abstract Even as the idea of the market seduces politicians around the world to take advantage of their abstract qualities they constantly run up against material reality Markets are always somewhere in place and it is in place that the smooth theories of markets falter and fail More than simply being embedded in particular places markets necessarily emerge in the various political social cultural and environmental relations that exist in and between places Markets shape places but the reverse is also true This collection of essays approaches markets from the ground up and from a part of the world often still regarded as peripheral to global capitalism the South Pacific With a wide variety of case studies including on indigenous economies childcare agriculture wine electricity metering finance education and housing the authors show how complex local social and cultural politics matter to how markets are made within and between places and the insights that can be gleaned from studying markets in this part of the world They explore the way superficially similar markets work out differently in different places and why as well as examining how market relations are constructed in places outside and on the edges of the centres of Western capitalism and what this says back to how markets are understood in those centres The book will be of particular

interest to scholars and students working in and between economic geography cultural economy political economy economic sociology and more **Global Capitalism** Hugo Radice,2014-08-01 The essays in this volume were published across the 1984 2011 period and range across a variety of topics and approaches to investigate the changing nature of global capitalism as a social order As such they are a valuable and instructive account of the evolution of global capitalism and of the debates which sought to make sense of this moreover they enable us to understand more clearly how capitalism may change and evolve in the coming years and decades The introduction provides a brief historical account of how global capitalism has changed since the 1960s before summarising each of the essays situating them more immediately in the context in which they were written After sketching the evolution of his views over the period the author concludes by discussing some important dimensions of global capitalism that need further study The twelve essays are presented in four sections dealing with the overarching theme of globalisation the case of Britain the developing regions of the global South and the former Soviet bloc and the crisis that has gripped global capitalism since 2008 Presenting an interdisciplinary approach that corresponds with the emergence of international political economy as a distinct field of scholarship this book will prove to be an invaluable resource for students and scholars of international political economy politics economics international relations development studies human geography critical sociology and business studies
