## **Carding Modern Fraud Detection:**

The Human Factor of Cybercrime Rutger Leukfeldt, Thomas J. Holt, 2019-10-11 Cybercrimes are often viewed as technical offenses that require technical solutions such as antivirus programs or automated intrusion detection tools. However, these crimes are committed by individuals or networks of people which prey upon human victims and are detected and prosecuted by criminal justice personnel. As a result, human decision making plays a substantial role in the course of an offence. The justice response and policymakers attempt to legislate against these crimes. This book focuses on the human factor in cybercrime, its offenders, victims, and parties involved in tackling cybercrime. The distinct nature of cybercrime has consequences for the entire spectrum of crime and raises myriad questions about the nature of offending and victimization. For example, are cybercriminals the same as traditional offenders, or are there new offender types with distinct characteristics and motives? What foreground and situational characteristics influence the decision making process of offenders? Which personal and situational characteristics provide an increased or decreased risk of cybercrime victimization? This book brings together leading criminologists from around the world to consider these questions and examine all facets of victimization, offending, offender networks, and policy responses. Chapter 13 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non-Commercial No Derivatives CC BY NC ND 4.0 license.

*Drug and Chemical Markets*, 1916    **Policing Cybercrime** David S. Wall, Matthew Williams, 2017-12-22 Cybercrime has recently experienced an ascending position in national security agendas world wide. It has become part of the National Security Strategies of a growing number of countries, becoming a Tier One threat above organised crime and fraud generally. Furthermore, new techno-social developments in social network media suggest that cyber threats will continue to increase. This collection addresses the recent inertia in both critical thinking and the empirical study of cybercrime and policing by adding to the literature seven interdisciplinary and critical chapters on various issues relating to the new generation of cybercrimes currently being experienced. The chapters illustrate that cybercrimes are changing in two significant ways that are asymmetrical. On the one hand, cybercrime is becoming increasingly professionalised, resulting in specialists that perform complex and sophisticated attacks on computer systems and human users. On the other, the hyper connectivity brought about by the exponential growth in social media users has opened up opportunities to non-specialist citizens to organise and communicate in ways that facilitate crimes on and offline. While largely distinct, these developments pose equally contrasting challenges for policing, which this book addresses. This book was originally published as a special issue of *Policing and Society*.
