Each of the biographies covers a career including birth and death, schooling, places of employment, travel in field work, publications, place of their cycad type specimens, list of species described, and list of species named for them. The latter two items are illustrated along with any honorific items such as currency stamps and so on. Additionally, each entry has a portrait. Palmae/Arecaceae family comprised of about six subfamilies, 200 genera and 2,700 species that are distributed all over the tropical, subtropical, and Mediterranean landscape. Palms are diverse ecologically and morphologically, a group of plants. Ornamental palms are an important component of landscape as well as interiorscapes. Additionally, these plants are a good source of food, feed, and shelter with numerous other commercial benefits. Likewise, other trees and crops landscape and field nurseries of palms are also subjected to various threats of insect pest and diseases caused by different plant pathogens. Amongst fungal diseases, leaf spots, leaf blights, Fusarium wilts, butt rots, bud rots, root rots, lethal yellowing, and decline of palms are major growth constraints of palm growth. In developing countries, very little attention has been paid on the etiology and management of these fungal diseases on ornamental palms.
