

TRAUMA-INFORMED CARE:

What does it look like?

@therecoverycenterusa

Language and Communication

Helpers use non-judgmental and empathetic language. They avoid making assumptions about an individual's past experiences. For instance, instead of asking, "What's wrong with you?" they might ask, "What happened to you?"

Providing Choices

In healthcare settings, offering choices to patients can be empowering. For example, allowing a patient to choose their meal preferences or the time of their therapy sessions gives them a sense of control.

Sensory-Friendly Environments

Recognizing that sensory sensitivities can be triggered by trauma, trauma-informed care might involve providing calming sensory rooms or ensuring that lighting and noise levels are adjustable to individual preferences.

Active Listening

Helpers actively listen to individuals without interrupting or rushing through appointments. They validate their feelings and experiences.

Training and Self-Care

Healthcare staff are trained in trauma-informed care principles and are encouraged to practice self-care to prevent burnout. This ensures that they can provide the best possible care to their patients.

De-escalation Techniques

In situations where patients may become agitated or distressed, trauma-informed care involves de-escalation techniques that prioritize safety and minimize re-traumatization.

From Safety to Sense of Safety Jenni

Spannari, Liz Grant, Monica Worline, Anne Birgitta Pessi, Henrietta Grönlund, Birgitte Johansen, 2025-09-23 The sense of safety is an essential foundation for human flourishing and well being It is a basic human need grounded in the evolutionary history of the human species as a part of the ecosphere However social political and health related global challenges have eroded deeply not only safety but our sense of safety Sense of safety is an individual experience but it is deeply rooted in the social communal and societal frames Thus in research we need to look at the sense of safety understanding that the wider societal situation strongly consists of individual and grass roots level experiences All people notwithstanding their race or age or any other variable need to feel safe Sense of safety is a feeling of relative security a comprehensive yet subjective psychological experience It requires ongoing appraisal closely associated with a person s awareness and perception That is sense of safety is related to safety but never the same and it is always about emotions It is deeply social never just about an individual and should be studied as such Sense of safety is pivotal for individuals communities in societies Interdisciplinary research on sense of safety is scarce and often academically too shallow e g not defining sense of safety as in e g Zacharia et al 2021 Murakami et al 2017 nor even differentiating between safety and sense of safety e g in Zou Yu 2022 Research and mainstream media focus mostly on the large scale picture of safety e g statistics trends in numbers and political reporting But what are the individual level experiences of sense of safety and sense of security today How are they culturally bound and to what extent more universal
