### Product

#### Controlmaster 100 Analogue Addressable Fire Alarm Control Panel

### System Benefits

The Chubb Controlmaster 100 utilises the latest in analogue addressable fire alarm technology to provide a high quality flexible fire detection system which is ideal for medium sized commercial and industrial premises.

#### High standards of build quality and performance

The controlmaster 100 has been designed to comply with the requirements of the European standard EN54.

#### Professionally finished

All control panels are engineered from high quality steel, with pre-formed 20mm knockouts located on the top of the enclosure for cable access.

#### Compatible with a wide range of detection devices

Smoke detectors, manual call points, loop powered sounders, loop powered beacons and other loop devices are wired onto a Controlmaster system via a single two-wire loop.

#### Reduced installation costs

Reduces installation cabling costs when compared with the cost of installing a large conventional fire detection system.

Powerful PC configuration software allows the system to be configured to suit individual site specific detection and control

requirements. Facilities such as delayed sounder response and day/night disablement of individual devices allow the fire detection system to be managed effectively.

#### Full control

In addition to providing precise incident location reports via the two line backlit liquid crystal display, the control panel can be used to control building services such as: voice alarm announcements, lift control, fire door closures, smoke vents and other appropriate measures.

#### Reliable operation

Controlmaster 100 can be connected to a Chubb Alarm Receiving Centre (ARC). This will provide 24hr remote monitoring ensuring a rapid response to fire or fault conditions.

#### Optional integral printer

Controlmaster 100 can be provided with an optional integral printer (40 characters per line).
