Description :

*"The rapid evolution of China from an "emerging" to a mature intellectual property jurisdiction has far-reaching implications for the law, policy and practice of IP, and their links with competition and technology law. Produced in the year China rose to fourth rank globally as user of the international patent system, this volume is an invaluable guide for the policymaker, the analyst and the practitioner alike, setting a thorough exposition of the substantive law and its application within a broader policy context, and offering a comprehensive, timely overview of an IP system just at the time it begins to assume central significance on the world stage." - Antony Taubman, Director, IP Division, WTO* This edited volume offers an excellent comprehensive overview of China's intellectual property and technology laws. The eminent contributors to this volume have played important roles in shaping China's IP system and in tackling the many challenges confronting it. By making their views of the system readily accessible to an English audience, this volume will undoubtedly add to our understanding of the legal protections and challenges facing innovation industries in China." - Mark Wu, Harvard Law School The pioneering studies in this book examine the fundamental role of intellectual property and technology laws as China is moving from "made in China" to "created in China". This book also helps us to understand about the interplay between China's intellectual property protection system and the potential for transition of China's economy, and provides numerous means to deal with the legislative difficulties in China's innovation-oriented strategy." - Wu Handong, Zhongnan University of Economics and Law, China

Written by some of China's leading academic experts and with a foreword by the former Chief Justice of the IP Tribunal of China's Supreme People's Court, this book combines for the very first time a review of both Chinese intellectual property and technology laws in a single volume in English. The book initially focuses on recent amendments to the laws of copyright, trademarks, patents, before moving on to discuss unfair competition and trade secrets, and the protection of intellectual property over electronic networks. Other chapters cover the regulation of digital networks and telecommunications IT and E-commerce the new antimonopoly law and competition and China's position on the TRIPS agreement. Of special note is a chapter written by in-house Counsel and the Chairman of the Quality Brands Protection Committee (a coalition of well known multinational brands) reviewing both brand protection and practical enforcement of intellectual property in China. This book will appeal to scholars and postgraduate students in commercial law (especially in IP, trade, competition, and technology), Chinese studies and business, as well as regulators, international agencies and law firms. Management consultancy and accounting firms, banks and investment firms will also find this book invaluable.

certainty available for domestic and foreign entities doing business in China including the adaptation of the legal framework to new technologies broadened scope of protected subject matter improved quality of filings and significant enhancement of enforcement not only with regard to remedies but also to procedural aspects Providing comprehensive coverage of all aspects of intellectual property protection in China including analysis of IP related provisions of China's new Civil Code the book emphasizes issues of concern to foreign traders and investors such as the following copyright law and software protection protection of trademarks including Chinese character and Roman script trademarks well known marks and bad faith applications technology transfer enforcement of trade secret and patent protection criminal liability for infringement unfair competition and antitrust law role of the binding interpretations of the Supreme People's Court administrative regulations that supplement the laws co operation with administrative authorities protection of geographical indications protection of trade names domain name dispute resolution special patent related laws protecting such areas as plant varieties integrated circuit layout designs and relevant provisions of the distinct laws of Hong Kong and Macao Full descriptions of the competencies of China's IP related institutions are included with detailed attention to procedural matters Brief historical notes in each chapter feature the most significant changes in each amendment of law and regulation Because in China the laws are supplemented and interpreted by numerous guidelines and circulars issued by ministries or courts the up to date knowledge and awareness provided in this new edition is essential for all companies investing in China or considering such investment as well as for practitioners counselling their clients on strategies In addition officials and policymakers involved in trade or other relations with China will benefit from a comprehensive update of what the current law is and a critical view of what the challenges are the 2021 IPLCN is a recommended read for those who seek a well written English textbook which covers the main principles of Chinese IP Law Clearly outlined it is probably one of the best of its kind on the market Its existence is welcome and necessary in the current era where languages are still obstacles By Tian Lu Book Review for The IP Kitten September 2021      Intellectual Property Rights in China Zhenqing Zhang, 2018-12-25

Over the past three decades China has transformed itself from a stagnant inward centrally planned economy into an animated outward looking decentralized market economy Its rapid growth and trade surpluses have caused uneasiness in Western governments which perceive this growth to be a result of China's rejection of international protocols that protect intellectual property and its widespread theft and replication of Western technology and products China's major trading partners particularly the United States persistently criticize China for delivering at best half hearted enforcement of intellectual property rights IPR norms Despite these criticisms Zhenqing Zhang argues that China does respect international intellectual property rights but only in certain cases In Intellectual Property Rights in China Zhang addresses the variation in the effectiveness of China's IPR policy and explains the mechanisms for the uneven compliance with global IPR norms Covering the areas of patent copyright and trademark Zhang chronicles how Chinese IPR policy has evolved within the

legacy of a planned economy and an immature market mechanism In this environment compliance with IPR norms is the result of balancing two factors the need for short term economic gains that depend on violating others IPR and the aspirations for long term sustained growth that requires respecting others IPR In case studies grounded in theoretical analysis as well as interviews and fieldwork Zhang demonstrates how advocates for IPR typically cutting edge Chinese companies and foreign IPR holders can be strong enough to persuade government officials to comply with IPR norms to achieve the country s long term economic development goals Conversely he reveals the ways in which local governments protect IPR infringers because of their own political interests in raising tax revenues and creating jobs     Intellectual Property and TRIPS Compliance in China Paul Torremans,Hailing Shan,Johan Erauw,2007-01-01 the editors of this book have done an excellent job and both academics and practitioners will find this book worthwhile and enjoyable Wei Shi Communications Law China s accession to the WTO and TRIPS heralded massive changes in Chinese intellectual property IP law This book asks whether all aspects of Chinese law and practice are now TRIPs compliant The study offers both Chinese and European perspectives Examining substantive IP law in detail the contributors conclude that the changes have been far reaching and TRIPS compliance has been achieved They also argue that China s IP laws are now addressing the new challenges of the digital revolution and the global economy Of equal importance is enforcement and in this respect the book reveals that change started later and that further work remains to be done The book highlights the important efforts that are underway and the undeniable progress that is being made All these issues are placed in an international context where the development agenda is becoming more important and where the discussion on the renegotiation of the TRIPS has started The contributors include leading members of the Chinese judiciary as well as academics politicians and practitioners from China Europe and Canada The approach taken to the subject combines academic rigorousness with political realism and the practical needs of operating an effective law enforcement and judicial system in a vast and rapidly developing country This book will be warmly welcomed by IP academics and researchers policy makers R D departments around the world and investors in China     *Intellectual Property Law in Asia* Christopher Heath,2002-12-16     **Chinese Foreign Investment Laws and Policies** Wei Jia,1994-11-21 China is engaged in a major evolutionary economic change Foreign direct investment FDI participation has been and will continue to be the driving force behind this change well into the next century This book presents to Western business and legal communities a comprehensive picture of the prevailing Chinese foreign investment climate More important it provides keen insight into the ways China must move to improve its laws and policies     *Conducting Business in China* Lei Mei,2012-10-19 With the rise of the Chinese economy and consumer market intellectual property IP conflicts in Sino U S business transactions are increasing and consequently companies are intent on achieving maximum IP values in China related cross border transactions *Conducting Business in China An Intellectual Property Perspective* provides readers with the necessary guidance on conducting business in China from an intellectual
