Supplemental Nutrition Assistance Program National Research Council,Institute of Medicine,Committee on National Statistics,Food and Nutrition Board,Committee on Examination of the Adequacy of Food Resources and SNAP Allotments,2013-04-23 For many Americans who live at or below the poverty threshold access to healthy foods at a reasonable price is a challenge that often places a strain on already limited resources and may compel them to make food choices that are contrary to current nutritional guidance To help alleviate this problem the U S Department of Agriculture USDA administers a number of nutrition assistance programs designed to improve access to healthy foods for low income individuals and households The largest of these programs is the Supplemental Nutrition Assistance Program SNAP formerly called the Food Stamp Program which today serves more than 46 million Americans with a program cost in excess of 75 billion annually The goals of SNAP include raising the level of nutrition among low income households and maintaining adequate levels of nutrition by increasing the food purchasing power of low income families In response to questions about whether there are different ways to define the adequacy of SNAP allotments consistent with the program goals of improving food security and access to a healthy diet USDA s Food and Nutrition Service FNS asked the Institute of Medicine IOM to conduct a study to examine the feasibility of defining the adequacy of SNAP allotments specifically the feasibility of

establishing an objective evidence based science driven definition of the adequacy of SNAP allotments consistent with the program goals of improving food security and access to a healthy diet as well as other relevant dimensions of adequacy and data and analyses needed to support an evidence based assessment of the adequacy of SNAP allotments Supplemental Nutrition Assistance Program Examining the Evidence to Define Benefit Adequacy reviews the current evidence including the peer reviewed published literature and peer reviewed government reports Although not given equal weight with peer reviewed publications some non peer reviewed publications from nongovernmental organizations and stakeholder groups also were considered because they provided additional insight into the behavioral aspects of participation in nutrition assistance programs In addition to its evidence review the committee held a data gathering workshop that tapped a range of expertise relevant to its task
