GET YOUR COPY TODAY **AI IN EVERYDAY LIFE: TRANSFORMING SOCIETY** Dr. Abhinandan Singh Dandotiya, Dr. Shashi Kant Gupta, Dr. Nidhi Dandotiya, Mr. Palash Sharma, 2024-09-18 Artificial Intelligence AI has rapidly woven itself into the fabric of everyday life transforming how society operates in profound ways Its integration into various aspects of daily routines has led to increased efficiency and convenience from personalized recommendations on streaming platforms to automated customer service AI's ability to analyze vast amounts of data and learn from it has enabled more intelligent decision making processes enhancing productivity across industries This technological advancement has also facilitated the development of smart homes and cities where AI driven systems manage everything from energy consumption to traffic flow creating environments that are more responsive to human needs Beyond convenience AI is reshaping the workforce and education requiring societies to adapt to new modes of work and learning Automation is taking over repetitive tasks freeing up human workers to focus on more complex and creative endeavors However this shift also raises concerns about job displacement and the need for reskilling In education AI driven personalized learning systems are providing tailored

educational experiences helping to bridge gaps in knowledge and cater to individual learning styles. These changes are prompting a reevaluation of traditional educational models and career paths highlighting the need for continuous learning and adaptability. On a broader scale AI is playing a critical role in addressing global challenges such as climate change, healthcare and resource management. In healthcare AI powered diagnostic tools are improving the accuracy and speed of disease detection leading to better patient outcomes. In environmental management AI is being used to monitor and predict environmental changes aiding in the development of sustainable practices. As AI continues to evolve its impact on society will only deepen presenting both opportunities and challenges that require careful consideration and responsible governance to ensure that its benefits are equitably distributed.

Artificial Intelligence, real consequences Juliana E. Goncalves, 2023-07-03 This project started within the Junior Council JC of the TPM AI Lab. The TPM AI Lab was established in 2021 at the Faculty of Technology Policy and Management TPM of TU Delft to consolidate research on AI within and outside TU Delft. At the TPM AI Lab we believe the noise around AI can be overwhelming. It is for us and we believe it is for others too. Recent developments in cutting edge technology have fueled a new wave of interest in AI research and application spanning multiple sectors and disciplines. Countless AI techniques, approaches and tools are being employed or developed for various purposes. Everybody wants to see what AI has to offer. It is difficult to keep track of everything happening in the AI world. At the same time the enthusiasm for AI is met with scepticism and scrutiny by critical scholars and experts.

The De Gruyter Handbook of Automated Futures Vaike Fors, Martin Berg, Meike Brodersen, 2024-09-23

How does automation affect us our environment and our imaginations What actions should we take in response to automation Beyond grand narratives and technology driven visions of the future what more can automation offer With these questions in mind The De Gruyter Handbook of Automated Futures provides a framework for thinking about and implementing automation differently It consolidates automated futures as an inter and transdisciplinary research field embedding the imaginaries interactions and impacts of automation technology within their social historical societal cultural and political contexts Promoting a critical yet constructive and engaging agenda the handbook invites readers to collaborate with rather than resist automation agendas It does so by pushing the agenda for social science humanities and design beyond merely assessing and evaluating existing technologies Instead the handbook demonstrates how the humanities and social sciences are essential to the design and governance of sustainable sociotechnical systems Methodologically the handbook is underpinned by a pedagogical approach to staging co learning and co creation of automated futures with rather than simply for people In this way the handbook encourages readers to explore new and alternative modes of research fostering a deeper engagement with the evolving landscape of automation
