## Media Sensation Booktube Recommendations:

*Social Reading Cultures on BookTube, Bookstagram, and BookTok* Bronwyn Reddan, Leonie Rutherford, Amy Schoonens, Michael Dezuanni, 2024-04-30 This book examines the reading cultures developed by communities of readers and book lovers on BookTube Bookstagram and BookTok as an increasingly important influence on contemporary book and literary culture. It explores how the affordances of social media platforms invite readers to participate in social reading communities and engage in creative and curatorial practices that express their identity as readers and book lovers. The interdisciplinary team of authors argue that by creating new opportunities for readers to engage in social reading practices bookish social media has elevated the agency and visibility of readers and book consumers within literary culture. It has also reshaped the cultural and economic dynamics of book recommendations by creating a space in which different actors are able to form an identity as mediators of reading culture. Concise and accessible this introduction to an increasingly central set of literary practices is essential reading for students and scholars of literature, sociology, media and cultural studies as well as teachers and professionals in the book and library industries.

*Emerging Pedagogies in the Networked Knowledge Society: Practices Integrating Social Media and Globalization* Limbu, Marohang, Gurung, Binod, 2013-11-30 Since the dawn of the digital era the transfer of knowledge has shifted from analog to digital local to global and individual to social. Complex networked communities are a fundamental part of these new information based societies. Emerging Pedagogies in the Networked Knowledge Society Practices Integrating Social Media and Globalization examines the production, dissemination and consumption of knowledge within networked communities in the wider global context of pervasive Web 2.0 and social media services. This book will offer insight for business stakeholders, researchers, scholars and administrators by highlighting the important concepts and ideas of information and knowledge based economies.

*Libraries Empowering Society through Digital Literacy* Heather Todd, Prudence W. Dalrymple, Luisa Marquardt, Ning Zou, 2025-11-03 High speed connectivity, massive growth in social media, the ubiquity of mobile devices and the emergence of artificial intelligence have led to information confusion, chaos and complexity. The ability for everyone to create, find, evaluate, use and apply information effectively is critical to successful personal, societal and global outcomes. Libraries and librarians must adapt their services and instructional approaches to engage with digital natives, immigrants and refugees to ensure all gain the competencies required by digital citizens. What constitutes digital literacy and how can we do it better? This book explores concepts, frameworks and practices in digital literacy to foster adoption of initiatives to extend digital literacy to all.

*Educational Research and Innovation What Does Child Empowerment Mean Today? Implications for Education and Well-being* OECD, 2024-05-15 Childhood is changing in ways that we are still unpacking, affected by digitalization, globalization and climate change as well as shocks such as the COVID 19 pandemic. In many OECD education systems, child empowerment is increasingly an explicit aim of policies and practices. But it is often poorly defined, which risks turning it into a mere slogan.

With the advancement of children's rights children are increasingly being included as stakeholders in decision making processes. This report gives examples of how children in OECD countries can and do participate in making decisions about issues that affect them. The report examines children's emotional well-being and physical activity and the role of schools as a physical space to create and support relationships. It also underlines the untapped potential of media education when it comes to seizing opportunities in childhood. Empowering all children to make the most of digital opportunities starts with further narrowing the gap in terms of access to digital tools and the Internet where inequalities are persistent and pervasive. So what does child empowerment mean today? Empowered children have the opportunity and ability to act on issues important and relevant to them, can learn by making mistakes and are key contributors to democracy.

### **Why Women Read Fiction**

Helen Taylor, 2019-12-05. Ian McEwan once said, "When women stop reading the novel will be dead." This book explains how precious fiction is to contemporary women readers and how they draw on it to tell the stories of their lives. Female readers are key to the future of fiction and as parents, teachers, and librarians, the glue for a literate society. Women treasure the chance to read alone but have also gregariously shared reading experiences and memories with mothers, daughters, grandchildren, and female friends. For so many, reading novels and short stories enables them to escape and to spread their wings intellectually and emotionally. This book, written by an experienced teacher-scholar of women's writing and literature, festival director, draws on over 500 interviews with and questionnaires from women readers and writers. It describes how, where, and when British women read fiction and examines why stories and writers influence the way female readers understand and shape their own life stories. Taylor explores why women are the main buyers and readers of fiction, members of book clubs, attendees at literary festivals, and organisers of days out to fictional sites and writers' homes. The book analyses the special appeal and changing readership of the genres of romance, erotica, and crime. It also illuminates the reasons for British women's abiding love of two favourite novels, *Pride and Prejudice* and *Jane Eyre*. Taylor offers a cornucopia of witty and wise women's voices of both readers themselves and also writers such as Hilary Mantel, Helen Dunmore, Katie Fforde, and Sarah Dunant. The book helps us understand why, in Jackie Kay's words, "our lives are mapped by books."

### **Reading Bestsellers**

Danielle Fuller, DeNel Rehberg Sedo, 2023-04-27. Readers are essential agents in the production of bestsellers but bestsellers are not essential to readers' leisure pursuits. The starting point in this Element is readers' opinions about and their uses of bestselling fiction in English. Readers' relationships with bestsellers bring into view their practices of book selection and their navigation of book recommendation culture. Based on three years of original research (2019-2021) including a quantitative survey with readers, interviews with social media influencers, and qualitative work with international Gen Z readers in a private Instagram chat space, the authors highlight three core actions contemporary multimodal readers make: choosing, connecting, and responding in a transmedia era where on- and offline media practices co-exist. The contemporary multimodal reader, or the MMR3, they argue, illustrates the pervasiveness of recommendation culture, reliance on trusted

others and an ethic of responsiveness     **Engagement with Culture in Transformative Times** Susanne Janssen,Nete Kristensen,Marc Verboord,2025-05-12 At the heart of this volume are the questions What does culture mean to European citizens in the face of globalisation digitalisation diversity and social inequality How do Europeans engage with culture in its various forms and what societal values are tied to this cultural engagement These questions are explored in depth across the 15 chapters of this book By delving into the understandings practices perceptions affordances and impacts of culture this book advances the study of the societal values of culture in contemporary European societies offering insights beneficial to both research and cultural policy work The book stands out with its five unique features It embraces an inclusive conception of culture spanning the arts popular culture and everyday cultural practices both offline and online It takes a grassroots approach starting from the cultural understandings and experiences of European citizens It employs a comparative method involving people from diverse socio economic groups in nine European countries with different cultural policy models social structural features socio cultural value orientations and media systems It builds on a multi and mixed methods approach including a large scale survey a smartphone study with experimental stimuli several phases of online content data collection and analysis qualitative interviews and focus groups Finally it delves into how wide ranging and interconnected sociocultural transformations such as migration digitalisation and social inequality impact people s understanding of and engagement with culture as well as the meanings and values they attribute to culture These unique features promise to offer a fresh and comprehensive perspective on cultural engagement in contemporary European societies The collection showcases the multiple often contradictory concepts and understandings of culture and its societal values among social groups within and across European societies The findings call for a social turn in cultural policy that extends beyond traditional arts and culture to support diverse cultural expressions that may enhance social values address complex social issues and shift the focus from economic objectives to promoting civic solidarity equity inclusivity tolerance and shared community values
