R. **Climate Change** Mike Hulme,2021-07-27 Written by a leading geographer of climate this book offers a unique guide to students and general readers alike for making sense of this profound far reaching and contested idea It presents climate change as an idea with a past a present and a future In ten carefully crafted chapters Climate Change offers a synoptic and inter disciplinary understanding of the idea of climate change from its varied historical and cultural origins to its construction more recently through scientific endeavour to the multiple ways in

which political social and cultural movements in today s world seek to make sense of and act upon it to the possible futures of climate however it may be governed and imagined The central claim of the book is that the full breadth and power of the idea of climate change can only be grasped from a vantage point that embraces the social sciences humanities and natural sciences This vantage point is what the book offers written from the perspective of a geographer whose career work on climate change has drawn across the full range of academic disciplines The book highlights the work of leading geographers in relation to climate change examples illustrations and case study boxes are drawn from different cultures around the world and questions are posed for use in class discussions The book is written as a student text suitable for disciplinary and inter disciplinary undergraduate and graduate courses that embrace climate change from within social science and humanities disciplines Science students studying climate change on inter disciplinary programmes will also benefit from reading it as too will the general reader looking for a fresh and distinctive account of climate change *Climate Fiction and Cultural Analysis* Gregers Andersen, 2019-09-25 Climate Fiction and Cultural Analysis argues that the popularity of the term climate fiction has paradoxically exhausted the term s descriptive power and that it has developed into a black box containing all kinds of fictions which depict climatic events and has consequently lost its true significance Aware of the prospect of ecological collapse as well as our apparent inability to avert it we face geophysical changes of drastic proportions that severely challenge our ability to imagine the consequences This book argues that this crisis of imagination can be partly relieved by climate fiction which may help us comprehend the potential impact of the crisis we are facing Strictly assigning climate fiction to fictions that incorporate the climatological paradigm of anthropogenic global warming into their plots this book sets out to salvage the term s speculative quality It argues that climate fiction should be regarded as no less than a vital supplement to climate science because climate fiction makes visible and conceivable future modes of existence within worlds not only deemed likely by science but which are scientifically anticipated Focusing primarily on English and German language fictions Climate Fiction and Cultural Analysis shows how Western climate fiction sketches various affective and cognitive relations to the world in its utilization of a small number of recurring imaginaries or imagination forms This book will be of great interest to students and scholars of ecocriticism the environmental humanities and literary and culture studies more generally **Our Shared Storm** Andrew Dana Hudson, 2022-04-05 Through speculative fiction five interlocking novelettes explore the possible realities of our climate future What is the future of our climate Given that our summers now regularly feature Arctic heat waves and wildfire blood skies polar vortex winters that reach all the way down to Texas and 100 year storms that hit every few months it may seem that catastrophe is a done deal As grim as things are however we still have options Combining fiction and nonfiction and employing speculative tools for scholarly purposes Our Shared Storm explores not just one potential climate future but five possible outcomes dependent upon our actions today Written by speculative fiction writer and sustainability researcher Andrew Dana Hudson Our Shared Storm features five

overlapping fictions to employ a futurist technique called scenarios thinking Rather than try to predict how history will unfold picking one out of many unpredictable and contingent branching paths it instead creates a set of futures that represent major trends or counterposed possibilities based on a set of climate modeling scenarios known as the Shared Socioeconomic Pathways SSPs The setting is the year 2054 during the Conference of the Parties global climate negotiations a k a The COP in Buenos Aires Argentina Each story features a common cast of characters but with events unfolding differently for them and human society in each alternate universe These five scenarios highlight the political economic and cultural possibilities of futures where investments in climate adaptation and mitigation promised today have been successfully completed kicked down the road or abandoned altogether From harrowing to hopeful these stories highlight the choices we must make to stabilize the planet Our Shared Storm is an experiment in deploying practice based research methods to explore the opportunities and challenges of using climate fiction to engage scientific and academic frameworks [Saving the World One Word at a Time](#) Ellen Briana Szabo,2015-06-16 Discover how writing fiction can make the world a better place This book offers instruction inspiration and prompts for writing cli fi speculative fiction that focuses primarily on the ways that climate change is transforming our world Explore how plot place and character development can make climate change personal By anticipating and elaborating on the future implications of climate change writers of cli fi use knowledge of science and climate to imagine and create apocalyptic or dystopian worlds with the goal of changing how humans think about inhabit and interact with our planet Place your writing at the forefront of efforts to reimagine the message and the messengers of climate change taking the issue out of politics and into the realm of the personal [\*\*The Routledge Handbook of Fiction and Belief\*\*](#) Alison James,Akihiro Kubo,Françoise Lavocat,2023-12-22 The Routledge Handbook of Fiction and Belief offers a fresh reevaluation of the relationship between fiction and belief surveying key debates and perspectives from a range of disciplines including narrative and cultural studies science religion and politics This volume draws on global cutting edge research and theory to investigate the historically variable understandings of fictionality and allows readers to grasp the role of fictions in our understanding of the world This interdisciplinary approach provides a thorough introduction to the fundamental themes of Theoretical and Philosophical Perspectives on Fiction Fiction Fact and Science Social Effects and Uses of Fiction Fiction and Politics Fiction and Religion Questioning how fictions in fact shape mediate or distort our beliefs about the real world essays in this volume outline the state of theoretical debates from the perspectives of literary theory philosophy sociology religious studies history and the cognitive sciences It aims to take stock of the real or supposed effects that fiction has on the world and to offer a wide reaching reflection on the implications of belief in fictions in the so called post truth era

[\*\*The Oxford History of the Novel in English\*\*](#) Cyrus R. K. Patell,Deborah Lindsay Williams,2024 An overview of US fiction since 1940 that explores the history of literary forms the history of narrative forms the history of the book the history of media and the history of higher education in the United States [\*Intermedial Ecocriticism\*](#) Jørgen Bruhn,Niklas Salmose,2023-12-11

This is the first book that combines intermedial studies with ecocriticism in order to critically reflect upon the risks and possibilities of representing the climate crisis in several different media and art forms *Fire and Snow* Marc DiPaolo, 2018-07-11 Fellow Inklings J R R Tolkien and C S Lewis may have belonged to different branches of Christianity but they both made use of a faith based environmentalist ethic to counter the mid twentieth century's triple threats of fascism utilitarianism and industrial capitalism. In *Fire and Snow* Marc DiPaolo explores how the apocalyptic fantasy tropes and Christian environmental ethics of the Middle earth and Narnia sagas have been adapted by a variety of recent writers and filmmakers of climate fiction a growing literary and cinematic genre that grapples with the real world concerns of climate change, endless wars and fascism as well as the role religion plays in easing or escalating these apocalyptic level crises. Among the many other well known climate fiction narratives examined in these pages are *Game of Thrones* *The Hunger Games* *The Handmaid's Tale* *Mad Max* and *Doctor Who*. Although the authors of these works stake out ideological territory that differs from Tolkien's and Lewis's, DiPaolo argues that they nevertheless mirror their predecessors ecological concerns. The Christians, Jews, atheists and agnostics who penned these works agree that we all need to put aside our cultural differences and transcend our personal socioeconomic circumstances to work together to save the environment. Taken together these works of climate fiction model various ways in which a deep ecological solidarity might be achieved across a broad ideological and cultural spectrum.
