**Learning to Read and Write** Margaret Harris, Giyoo Hatano, 1999-05-27 For many years the development of theories about the way children learn to read and write was dominated by studies of English speaking populations As we have learned more about the way that children learn to read and write other scripts whether they have less regularity in their grapheme phoneme correspondences or do not make use of alphabetic symbols at all it has become clear that many of the difficulties that confront children learning to read and write English specifically are less evident or even non existent in other populations At the same time some aspects of learning to read and write are very similar across scripts The unique cross linguistic perspective offered in this book including chapters on Japanese Greek and the Scandinavian languages as well as English shows how the processes of learning to read and spell are affected by the characteristics of the writing system that children are learning to master
