

Project Charter Template

Introduction

This document provides outlines, for a scalable charter tool and associated charter development methods that can be used by Implementing Agencies (IA) to initiate and authorize a capital project. These tools were prepared by the CPMWG Scalable Project Management Tools Subcommittee as one of the deliverables. The tools may be adjusted to meet IA needs provided the IA keeps the elements of the tools.

PMBOK 2013 provides this definition for a Project Charter: "The project charter is issued by the project initiator, or sponsor that formally authorizes the existence of a project, and provides the project manager with the authority to apply organizational resources to project activities."

The Charter Template is the tool for authorizing all Checklists A, B, and C projects. This tool is scalable for all Checklist A, B, and C project categories as defined in the CPMWG2 Scalable Tools Work Product. The level of detail in the charter should be scaled as appropriate for the size and complexity of the project, but each topic in the Charter Template should be considered for all Checklist projects.

For small projects, under the Checklist threshold (less than \$100k), individual IA's should develop a small project initiation process. The Charter Template tool can also be used as a resource for IA's to develop their small project initiation process. Some IA's have also chosen to use a project initiation form to initiate the preparation of the project charter for larger projects.

The project charter tool requires inputs from a variety of project planning and management processes to produce the charter. Examples of these processes include scoping, cost estimating, scheduling and risk evaluation. The recommendations in this document assume that project managers have experience in these processes. The project management processes with particular application in meeting King County's project chartering requirements are described within the template tool.

Purpose

To provide IA management, project managers, and other staff who manage King County capital improvement projects (CIP) with a scalable tool for preparing and approving Project Charters.

Objectives

These are the objectives of the charter tool:

1. Describe the use of the Project Charter tool.
2. Present an overview of selected charter development processes that have specific application to King County charter requirements.
3. Familiarize IA staff with terminology associated with project charters.
4. Provide a list of resources to aid in preparing a project charter.

1 – Project Charter Template

The Project Charter Template includes key items to include in a charter document, ranging from project identification, scoping, cost and schedule projections, to approvals. The template presents a list of the recommended elements to be included. The project manager should address each individual topic in the

Shipbroking and Chartering Practice Evi Plomaritou, Anthony Papadopoulos, 2017-12-12 Now in its eighth edition this classic text is a first point of reference for anyone looking to obtain an understanding of chartering and shipbroking practice. It provides hands on commercially focused explanations of chartering business and invaluable advice on how the shipping market operates across a broad range of topics. The authors also deal expertly with the legal, financial, operational and managerial aspects of chartering, offering numerous case studies which clearly link theory to practice. This new edition has been fully revised and updated to reflect the current trends in chartering practice, legal developments and standard forms of charterparties. New to this edition: Enriched with practical examples covering crucial aspects of chartering and shipbroking business such as voyage estimations, freight conversions and tanker calculations. New material on day to day laytime principles including Laytime Definitions for Charterparties 2013 associated commentary and relevant examples. Shipping Marketing as a modern tool of improving chartering and shipbroking business. Expanded coverage of the economic background of chartering including markets, vessels, cargoes, trades and fixtures. Freight rates for all vessel types from 1980 to 2015. Updated review of well known standard charterparty documents including NYPE 2015 together with clauses and wordings commonly applying to various charter types. Analytical glossary containing typical terms and abbreviations used in chartering negotiations. This book is an essential guide for practitioners in private practice and in house for shipowners and cargo houses as well as those studying shipbroking and chartering.

The Practice of Quality Management Phillip J. Lederer, Uday S. Karmarkar, 2013-06-29 The Practice of Quality Management presents the results of eleven ground breaking research projects in quality management. It is the first collection of research papers by academics in this area. The projects are empirical studies on total quality management that suggest new ways to think about quality. The objective of the research found in this book is to develop theory and to assist practice. Thus this volume is of interest to both academic researchers and practising managers. The chapters fall into four categories: Performance, Understanding TQM, Organizations and Using TQM. All of the chapters show that there are many different applications and research issues associated with quality. The chapters on Understanding TQM suggest that it is possible to develop and test theories of quality. The chapters on Performance demonstrate that studies of the operational and financial effect of quality can yield positive results. Many thinkers on quality consider that organizational impacts of quality are the most important drivers of the quality process. The chapters on Organizations present evidence on how quality programs affect human resource management and organizational structure. Finally the chapters on Using TQM present several studies of applications of quality management.
