Concept Connector Study Guide Empire:

Medicine, mobility and the empire Markku Hokkanen,2017-11-02 David Livingstone's Zambesi expedition marked the beginning of an ongoing series of medical exchanges between the British and Malawians. This book explores these entangled histories by placing medicine in the frameworks of mobilities and networks that extended across Southern Africa and beyond. It provides a new approach to the study of medicine and empire. Drawing on a range of written and oral sources the book argues that mobility was a crucial aspect of intertwined medical cultures that shared a search for therapy in changing conditions. Mobile individuals, ideas and materials played key roles in medical networks that involved both professionals and laypeople. These networks connected colonial medicine with Protestant Christianity and migrant labour. The book will be of value to scholars and students of history and anthropology of colonialism and medicine as well as a wider readership interested in the plural search for health in Africa and globally

Liminal Spaces and Spatial Practices in Byzantium

Buket Kitapçı Bayırı, Myrto Veikou, 2025-12-29 *Liminal Spaces and Spatial Practices in Byzantium* offers a novel twist combining intra and inter disciplinary research across the humanities and social sciences by transforming two distinct disciplinary concepts liminality from social anthropology and space from cultural geography into methodological devices for historical investigation. The focus has been an investigation of conceptions of spatial liminality in the Byzantine world. This book showcases alternatives to binary oppositions such as inside/outside, core/periphery, isolation/connectedness, stability/instability, known/unknown, earthly/heavenly, self/other, and good/bad through delineating liminality as an epistemological tool. In this volume the authors were invited to offer an analysis of Byzantine spatial experiences attested through material remains or texts as a sort of working platform from which to assess in due course the presence of a liminal dimension in medieval spatiotemporal situations. They have sought to understand whether certain types of spaces such as rivers, deserts, islands, forests, mountains, houses, thresholds, gates, monasteries, lighthouses, and bridges accommodate or even create liminal situations in the eyes of the people experiencing them. This book will appeal to students and scholars alike interested in Byzantine history and culture

Misplaced Objects Silvia Spitta, 2009-07-01 When things move, things change. Starting from this deceptively simple premise, Silvia Spitta opens a fascinating window onto the profound displacements and transformations that have occurred over the six centuries since material objects and human subjects

began circulating between Europe and the Americas. This extended reflection on the dynamics of misplacement starts with the European practice of collecting objects from the Americas into Wunderkammern literally cabinets of wonders. Stripped of all identifying contexts these exuberant collections including the famous Real Gabinete de Historia Natural de Madrid upset European certainties forcing a reorganization of knowledge that gave rise to scientific inquiry and to the epistemological shift we call modernity. In contrast cults such as that of the Virgin of Guadalupe arose out of the reverse migration from Europe to the Americas. The ultimate marker of mestizo identity in Mexico the Virgin of Guadalupe is now fast crossing the U.S. Mexico border and miracles are increasingly being reported. *Misplaced Objects* then concludes with the more intimate and familial collections and recollections of Cuban and Mexican American artists and writers that are contributing to the Latinization of the United States. Beautifully illustrated and radically interdisciplinary *Misplaced Objects* clearly demonstrates that it is not the awed viewer but rather the misplaced object itself that unsettles our certainties allowing new meanings to emerge.

Walford's Guide to Reference Material: Generalia, language and literature, the arts Albert John Walford, 1998
From its first edition the purpose of Walford has been to identify and evaluate the widest possible range of reference materials. No rigid definition of reference is applied. In addition to the expected bibliographies indexes dictionaries encyclopaedias and directories a number of important textbooks and manuals of general practice are included. While the majority of the items are books Walford is a guide to reference material. Thus periodical articles microforms online and CD ROM sources are all represented. In this volume a particular effort has been made to improve coverage of the latter two categories.
