Recovery Mechanisms in Database Systems Vijay Kumar, Meichun Hsu, 1998 Databases like any computer system sometimes fail This book is a contributed volume containing chapters from the world's experts in the field of database recovery The title gives an excellent summary of the advances in database recovery schemes

Database Recovery Vijay Kumar, Sang Hyuk Son, 2012-12-06 Database Recovery presents an in depth discussion on all aspects of database recovery Firstly it introduces the topic informally to set the intuitive understanding and then presents a formal treatment of recovery mechanism In the past recovery has been treated merely as a mechanism which is implemented on an ad hoc basis This book elevates the recovery from a mechanism to a concept and presents its essential properties A book on recovery is incomplete if it does not present how recovery is practiced in commercial systems This book therefore presents a detailed description of recovery mechanisms as implemented on Informix OpenIngres Oracle and Sybase commercial database systems Database Recovery is suitable as a textbook for a graduate level course on database recovery as a secondary text for a graduate level course on database systems and as a reference for researchers and practitioners in industry

Database Systems for Advanced Applications Arbee L. P. Chen, Frederick H. Lochovsky, 1999 These conference papers cover the 6th International Conference on Database Systems for Advanced Applications They examine topics such as the World Wide Web workflow management and specification management visualization and multimedia databases spatial databases and index techniques

Concurrency Control And Recovery In Oltp Systems: High Scalability And Availability Peng Cai, Jinwei Guo, Aoying Zhou, 2019-04-05 Transaction processing is fundamental for many modern applications These applications require the backend transaction processing engines to be available at all times as well as provide a massive horizontal scale for intensive transaction requests Concurrency Control and Recovery features recent progress in research in online transaction processing The book also showcases the authors research on a highly scalable OLTP system Its contents include the designs of an efficient multiple version storage engine a scalable range optimistic concurrency control high performance Paxos based log replication global snapshot isolation and fast follower recovery This book is written for professionals researchers and graduate students specialising in database systems and its related fields

Transactional Information Systems Gerhard Weikum, Gottfried Vossen, 2002 This book describes the theory algorithms and practical implementation techniques behind transaction processing in information technology systems

The Concurrency Control and Recovery Problem for Multilevel Update Transactions in Multilevel Secure Database Systems Thomas F. Keefe, Amit G. Mathur, 1994 Abstract This paper addresses the problem of a transaction reading and writing data at multiple classification levels in a Multilevel Secure MLS

database system We refer to such transactions as multilevel update transactions and show that no secure scheduler can ensure atomicity of multilevel update transactions in the presence of transaction aborts We then determine the covert channel capacity of various scheduling schemes There are essentially two ways of scheduling multilevel update transactions The first which ensures strong atomicity involves delaying the commit step of a low level subtransaction until the fates of all siblings are known The second scheme which ensures only semantic atomicity allows each subtransaction to commit or abort independently and compensates for committed transactions when necessary Analysis of these schemes indicate that the compensation approach leads to lower covert channel bandwidths A concurrently control and recovery protocol based on compensation is proposed for scheduling multilevel update transactions The correctness of the protocol is demonstrated and security issues are discussed *Resources in Parallel and Concurrent Systems*, 1991 Computer Systems Organization
