THIRD EDITION

## **Controlling Immigration** **Controlling Immigration:**

**Controlling Immigration** James Hollifield, Philip L. Martin, Pia Orrenius, 2014-07-30 The third edition of this major work provides a systematic comparative assessment of the efforts of a selection of major countries including the U.S. to deal with immigration and immigrant issues paying particular attention to the ever widening gap between their migration policy goals and outcomes. Retaining its comprehensive coverage of nations built by immigrants and those with a more recent history of immigration the new edition pays particular attention to the tensions created by post colonial immigration and explores how countries have attempted to control the entry and employment of legal and illegal Third World immigrants how they cope with the social and economic integration of these new waves of immigrants and how they deal with forced migration.

**Controlling Immigration** James F. Hollifield, Philip L. Martin, Pia M. Orrenius, François Héran, 2022-09-27 The fourth edition of this classic work provides a systematic comparative assessment of the efforts of major immigrant receiving countries and the European Union to manage migration paying particular attention to the dilemmas of immigration control and immigrant integration. Retaining its comprehensive coverage of nations built by immigrants the so called settler societies of the United States Canada Australia and New Zealand the new edition explores how former imperial powers France Britain and the Netherlands struggle to cope with the legacies of colonialism how social democracies like Germany and the Scandinavian countries balance the costs and benefits of migration while maintaining strong welfare states and how more recent countries of immigration in Southern Europe Italy Spain and Greece cope with new found diversity and the pressures of border control in a highly integrated European Union. The fourth edition offers up to date analysis of the comparative politics of immigration and citizenship the rise of reactive populism and a new nativism and the challenge of managing migration and mobility in an age of pandemic exploring how countries cope with a surge in asylum seeking and the struggle to integrate large and culturally diverse foreign populations.

**Controlling Immigration** Wayne A. Cornelius, Philip L. Martin, James Frank Hollifield, 1994 This text is a systematic comparative multidisciplinary study of immigration policy and policy outcomes in nine industrialized democracies the United States Canada Great Britain France Germany Belgium Italy Spain and Japan. It has two central theses The first the convergence hypothesis is that there is a growing similarity in immigration policy results and public reaction within these nine countries. The second thesis the gap hypothesis argues that the gap between the goals of immigration policy and its outcomes is wide and growing wider. Beyond testing these hypotheses against new evidence the book seeks to explain the declining effectiveness of immigration control measures in todays labour importing democracies. In each of the country profiles the author explains why certain measures were chosen and why they usually failed to achieve their stated objectives.

**Canadian Liberalism and the Politics of Border Control, 1867-1967** Christopher G. Anderson, 2012-11-17 Since 9/11 Canada's reputation as an inclusive country that takes in immigrants and refugees has been clouded by restrictive immigration policies increased interdiction and the detention of

asylum seekers Moreover public debate over the arrival of non citizens especially those seeking entry through unofficial channels is now often framed within a security discourse that is used to justify a more restrictive approach These developments are not surprising in the current context but as Anderson illustrates they are also nothing new Canadian Liberalism and the Politics of Border Control sheds light on the long and complex history of Canada s efforts to control its borders Framing pivotal moments within a long standing but often overlooked debate over the rights of non citizens Anderson demonstrates that today s more restrictive approach reflects traditions deeply embedded within liberal democracies His insights into Canadian immigration and refugee history offer valuable lessons for understanding the nature of contemporary liberal democratic control policies

**Modes of Migration Regulation and Control in Europe** Jeroen Doomernik, Michael Jandl, 2025-10-01

In Europe immigration is a politically burning issue especially when it comes to the arrival of asylum seekers and illegal labour migrants Governments want to keep them under control in order to limit their numbers Yet traditionally there were strong differences between European states in the extent to which they sought to do so and the instruments employed to that end Currently the contours become visible of a common approach towards notably irregular migration This becomes clear from the country studies comprising this volume

**Opening and Closing the Doors** Frank D. Bean, Georges Vernez, Charles B. Keely, 1989

**Migration** Johannes Knolle, James Poskett, 2020-06-11

Eight interdisciplinary essays by leading scholars and public figures discuss the timely theme of migration in a range of contexts

**Eugenical Sterilization in the United States** Harry Hamilton Laughlin, 1922

**The Territorial Factor** Gertjan Dijkink, Hans Knippenberg, 2001

Nowadays political territoriality is profoundly put to the test by globalization the rise of the network society international migration and new types of risk that state governments find hard to control Yet new political configurations do not invalidate the relevance of territory and territorial identity right away Moreover people who want to escape or forget foreign dominace still reach for the traditionally sovereign state Eastern Europe Asia In this book an international group of political geographers analyse the meaning of post modern transfromation in territoriality at different geographical scales global inter national and local They cover such varied topics as the probability of a clash between civilizations the rise of World cities the disintegration of African States ethnic conflicts and politics in Europe the meaning of a supranational territorial order European Union the end of the welfare state nation building and its symbols Israeli cultural politics urban regimes and local conflict defense mechanisms The perspectives put forward match more general theoretical geography and political science and involve case studies from different parts of the World This important new study is of immediate interest to students of all levels of politcial science sociology social geography administrative science international relations contermpoary history and to policy makers and politicians
