Conversations Human Nature Agust Fuentes:

High on God James Wellman Jr.,Katie Corcoran,Kate Stockly,2020-01-10 God is like a drug a high I can t wait for the next hit This direct quote from a megachurch member speaking about his experience of God might be dismissed as some sort of spiritually induced drug riff However according to the research in this book it was not only sincere but a deeply felt and sought after sensibility Megachurch attendees desire this first hand experience of God and many report finding it in their congregations The book focuses on the emotional social and religious dynamics that pull thousands of people into megachurches and how those churches make some feel like they are high on God and can t wait to get their next spiritual hit High on God gives the first robust and plausible explanation for why megachurches have conquered the churchgoing market of America Without condescension or exaggeration the authors show the genius of megachurches the power of charisma the design of facilities the training of leaders the emotional dynamics and the strategies that bring people together and lead them to serve and help others Using Emile Durkheim s concept of homo duplex the authors plot the strategies that megachurches employ to satisfy the core human craving for personal meaning and social integration as well as personal identity and communal solidarity The authors also show how these churches can go wrong sometimes tragically so But they argue that for the most part megachurches help their attendees find themselves through bonding with and serving others

Humans Surekha Davies,2026-03-17 Surekha Davies invites readers to imagine the lives of historical monsters and to empathize with their often wretched treatment Science magazine A history of how humans have created monsters out of one another from our deepest fears and what these monsters tell us about humanity s present and future Monsters are central to how we think about the human condition Join award winning historian of science Dr Surekha Davies as she reveals how people have defined the human in relation to everything from apes to zombies and how they invented race gender and nations along the way With rich evocative storytelling that braids together ancient gods and generative AI Frankenstein s monster and E T Humans A Monstrous History shows how monster making is about control It defines who gets to count as normal In an age when corporations increasingly see people as obstacles to profits this book traces the long volatile history of monster making and charts a better path for the future The result is a profound effervescent empowering retelling of the history of the world for anyone who wants to reverse rising inequality and polarization This is not a history of monsters but a history through monsters

Untrue Wednesday Martin,2018-09-18 From the 1 New York Times bestselling author of Primates of Park Avenue a bold timely reconsideration of female infidelity that will upend everything you thought you knew about women and sex What do straight married female revelers at an all women s sex club in LA have in common with nomadic pastoralists in Namibia who bear children by men not their husbands Like women worldwide they crave sexual variety novelty and excitement In ancient Greek tragedies Netflix series tabloids and pop songs we ve long portrayed such cheating women as dangerous and damaged We love to hate women who are untrue But who are they really And why in this

age of female empowerment do we continue to judge them so harshly In *Untrue* feminist author and cultural critic Wednesday Martin takes us on a bold fascinating journey to reveal the unexpected evolutionary legacy and social realities that drive female faithlessness while laying bare our motivations to contain women who step out Blending accessible social science and interviews with sex researchers anthropologists and real women from all walks of life *Untrue* challenges our deepest assumptions about ourselves monogamy and the women we think we know From recent data suggesting women may struggle more than men with sexual exclusivity to the revolutionary idea that females of many species evolved to be promiscuous to Martin's trenchant assertion that female sexual autonomy is the ultimate metric of gender equality *Untrue* will change the way you think about women and sex forever **State of Affairs** Richard J. Coleman, 2014-10-24 The last sixty years have witnessed a virtual explosion of interest in how modern science and traditional Christianity intersect This new rapprochement with science has irrevocably altered how we think of God It constitutes a foundation from which we cannot retreat but from which we also cannot move forward until we examine the presumptions on which it is based For the first time Richard Coleman interprets in a clear and meaningful way the themes and practitioners that make this rapprochement different and what it has achieved But this book is more than description it is an inquiry into whether Christian theology has lost its authentic voice by its singular focus on accommodating modern science **How Real Is Race?** Carol C. Mukhopadhyay, Rosemary Henze, Yolanda T. Moses, 2025-03-14 Biologically speaking there is no such thing as race Yet this seems to contradict the experiences of people in the United States and other countries where racial classification is used daily by individuals and institutions Race still matters whether in wealth accumulation educational achievement health the legal system or in personal safety How can race not be real when we experience its effects every day Mukhopadhyay Henze and Moses systematically deconstruct the myth of race as biology and address the reality of race as a cultural invention drawing on biocultural historical and cross cultural anthropological perspectives In doing so they shed light on the intricate interplay among race biology culture power and stratification Part I The Fallacy of Race as Biology unravels the myth that races are biologically valid divisions of humanity Part II Culture Creates Race explores race as a social construction the emergence of the racial worldview as ideological justification for inequality and how social processes especially restrictions on interracial sex and marriage maintained visible markers of racial hierarchy Part III Contemporary Issues examines current manifestations of racial stratification including the educational achievement gap health disparities and how the language of race embodies and reinforces a racial worldview New to this Edition New Chapter 11 Unpacking the Health Consequences of Racial Stratification explores the continuing impacts of the racial worldview on race related health disparities using the COVID 19 pandemic maternal health and weathering and exposure to environmental toxins as case studies New Chapter 12 Dismantling the Racial World View explores racial ideology including language and offers alternative approaches to racial language dilemmas Updated and expanded discussion of human evolution includes contemporary

critiques and alternative scenarios of long standing models of human evolution and emphasizes our collective African roots Updated and expanded coverage of genomics DNA epigenetic processes and the enormous human variability at the molecular level all challenging nature versus nurture models of how we become who we are New data on immigrants languages religions socio economic and regional racial ethnic patterns interracial marriage and other trends explores contemporary diversity in the United States and suggests traditional racial ideology and categories are becoming obsolete
