King, 2015-10-01 HIGHLY COMMENDED for the British Medical Awards book prize for Popular Medicine Up to 10% of people will suffer a mild head injury or mild traumatic brain injury in their lifetime and up to 50% of those people will also find they have lingering post concussion symptoms in the months or

years afterwards These symptoms can include headaches dizziness fatigue irritability sleep disturbance reduced day to day memory poor concentration taking longer to think muzzy headedness depression anxiety tinnitus blurred or double vision sensitivity to light or noise frustration nausea restlessness and sensitivity to alcohol In such circumstances the mild head injury may feel anything but mild This is particularly so if large areas of your day to day life are affected People in these circumstances can have their difficulties compounded by the very different explanations for their persisting difficulties These usually involve receiving contradictory opinions about the extent to which ongoing symptoms are caused by neurological brain injury or other factors These complicating factors can make it very difficult to find the right kind of service or expertise after a TBI Patients can easily feel like they are being pushed from pillar to post when trying to find services that can help with their problems On top of all of this there is a distinct lack of good science based information for patients about the best ways to manage PCS It is therefore very common for those who experience prolonged difficulties to find their situation extremely confusing frustrating and stressful Dr Nigel King is an expert with much experience in this area and has written a very valuable book weaving together the most useful knowledge in this area It clarifies some of the complex issues for those who suffer with prolonged problems and provides practical science based self help guidance for managing TBI difficulties Using cognitive rehabilitation techniques and CBT approaches for the associated mental health complications of PCS this much need book provides help hope and understanding for what can be a highly disabling and misunderstood condition

*Personal Coping Strategies of Individuals with Mild Traumatic Brain Injury* Jane Catherine Swenson,1995 [Living with Mild Brain Injury](#) Pauline O'Connor,2020-12-29 This important book presents a unique personal account of the impact a mild traumatic brain injury can have It tells the story of Pauline who was 33 when a late football tackle caused a bleed in her brain which went undiscovered for 18 months The account includes descriptions of hidden symptoms of concussion and post concussion syndrome pitfalls in diagnoses the uneven progress of recovery and the effect of the varied reactions which others have to an acquired brain injury The author incorporates memories alongside extracts from clinic notes diary entries and emails to reflect the disjointed progress of diagnosis and recovery as although similar no two head injuries are the same Through this book the reader gains an appreciation of the confusion experienced by many brain injury survivors which sheds light on why some may develop unusual behavior or mental health issues and how such issues can be alleviated Brain injuries are poorly understood by the general public and this can lead to difficult interactions Moreover complications in diagnosis means some may not realize they have this milder form of brain injury This book will enlighten brain injury survivors and affected families and allow professionals an insight into their patients experiences As concerns grow over the risks which contact sports pose this book shows how even mild brain injuries can wreak havoc with careers relationships and one s sense of self but that a happy life can still be found *Stress, Appraisal and Coping Following Traumatic Brain Injury* Thad Q. Strom,2006 *Neuropsychological Management of Mild Traumatic Brain Injury* Sarah A. Raskin,Catherine A. Mateer,2000

Despite the importance of the problem strikingly little has been written about effective approaches to the treatment of individuals with mild to moderate brain injury This book is designed for neuropsychologists counseling and rehabilitation psychologists and other rehabilitation professionals who work with individuals who have sustained brain injuries of mild to moderate severity It provides a context for understanding and evaluating the common consequences of such injuries and offers both theoretical perspectives and practical suggestions for helping individuals to adjust to and compensate for residual difficulties Early chapters focus on different domains of cognitive functioning while later chapters describe clinical approaches to helping clients manage common emotional reactions such as depression irritability and anxiety While the book acknowledges and discusses the controversy about the origins of persistent symptoms following mild brain injury it does not focus on the controversy Rather it adopts a what works approach to dealing with individuals who have persistent symptoms and perceptions that contribute to disability and to emotional distress Many of these individuals benefit significantly from neuropsychological intervention Case examples throughout the book illustrate the adaptation of cognitive cognitive behavioral and traditional psychotherapeutic approaches to individuals with mild to moderate brain injury Self regulation and self management of both cognitive failures and emotional responses are described as appropriate and effective in this population
