The Twitter Book Tim O'Reilly,Sarah Milstein,2009-05 Provides information on using the social networking site Twitter

Marketing Communications Patrick De Pelsmacker,Maggie Geuens,Joeri van den Bergh,2010 Marketing communication has an overwhelming impact on both society and business This text offers a comprehensive overview of the cornerstones techniques and applications of marketing communications practice in a European context Framework for Crawling and Local Event Detection Using Twitter Data Hrishikesh Bakshi,2011 Twitter is a popular social media service

with millions of registered users as of December 2010 Twitter hosts substantial amounts of user contributed data of real world events Twitter's core functions represent a simple social awareness stream model Twitter users share information about upcoming events the events the users are attending and events being broadcasted The users also specify their location in their profile on Twitter We can programmatically collect data from Twitter using their API and detect top terms and events in the data Researchers can use this program to collect any kind of data from social networks easily Journalists can get a real time the list of events detected by this method In this thesis we propose a solution to tackle the problem above We wrote scripts that collected Twitter data through Twitter API The scripts collect data according to user location and by search keywords We built a web interface that provides mechanism to manage the collection of data The web interface allows addition of new locations and keywords to the data collection We collected Twitter data for important locations across the United States of America and the world using these tools We use two approaches to detect trends in the data In the first approach we detected spikes in data by looking at overall rate of tweets at each location over a period of time In the second approach we indexed the data according to location and time of the day Then we identified trends in the indexed data by ranking the terms according to spikes in term frequency Using our framework we can detect the top events and trends for a given time period and location according to Twitter data
