Informational Texts in Pre-Kindergarten through Grade-Three Classrooms Elaine M. Bukowiecki, Marlene P. Correia, 2016-11-14 This book presents a myriad of instructional techniques and critical literacy strategies while serving as a professional resource for inservice and preservice primary grade teachers as they include informational texts in their classrooms. In each of the nine chapters there is a particular topic that guides the focus of the chapter. These themes include a rationale for incorporating informational texts in the primary grade classroom, a discussion of the unique features of informational texts, the selection of high quality informational materials for primary readers, critical literacy prereading during reading and post reading strategies, the writing of informational texts and inquiry projects for the primary classroom. This book also contains a preface, an introduction and an afterword in which the controversy regarding the Common Core State Standards is discussed. Unique features of each chapter are specific standards reflecting the Common Core State Standards strategies for all students to be successful with the Standards, transcriptions of lessons from primary grade classrooms, examples of pupils work as they interact with informational materials and a Give It a Try section where a lesson plan or a pedagogical suggestion is presented for the reader to try out in his/her own classroom.

The Qualified Student

Harold S. Wechsler, 2017-09-29 In *The Qualified Student* Harold S. Wechsler focuses on methods of student selection used by institutions of higher education in the United States. More specifically, he discusses the way that college and university reformers employed those methods to introduce higher education into a broader cross section of America by extending access to an increased number of students from nontraditional backgrounds. Implicit in much of this book is an underlying social and ethical question: How legitimate was and is higher education's regulation of social mobility? Public concern over colleges and universities' practices became inevitable once they became regulators between social classes. The challenging of colleges' admissions policies in the courts augments similar concerns that have been present in legislatures for decades. The volume is divided into three main sections: Prerequisites, Columbia and the Selective Function and Implications. It focuses mainly on four universities: The University of Michigan, Columbia University, the University of Chicago, and the City University of New York. Wechsler maintains that, unlike other universities, these institutions were pacesetters; they did not adopt a new policy simply because some other college had already adopted it. A new introduction brings the book originally published in 1977 up to date and demonstrates its continuing importance in today's academic world of selective admissions.

Constructing Policy Change Linda A. White, 2017-01-01 In *Constructing Policy Change* Linda A. White examines the expansion of early childhood education and care (ECEC) policies and programs in liberal welfare states including Australia, Canada, New Zealand, the UK and the USA. In the first part of the book the author investigates the sources of policy ideas that triggered ECEC changes in various national contexts. This is followed by a close analysis of cross-national variation in the implementation of ECEC policy in Canada and the USA. White argues that the primary mechanisms for policy change are

grounded in policy investment logics as well as cultural logics that shifts in public sentiments and government beliefs about the value of ECEC policies and programs are rooted in both evidence based arguments and in principled beliefs about the policy A rich nuanced examination of the reasons motivating ECEC policy expansion and adoption in different countries Constructing Policy Change is a corrective to the comparative welfare state literature that focuses on political interest alone
