

Statement of Commitment

The 2023 BIOTech Futures Challenge is a 4 week challenge commencing on the 4th of September and ending on the 29th of September. Please ensure that you are able to commit to the Challenge during these dates. The Symposium will be held on the 16th of October for finalists to present their work. Everyone involved in the Challenge is encouraged to attend.

Mentors

Mentors are the backbone of the BIOTech Futures program and in the past teams have mentioned that working with their mentors has been the greatest take-away from the Challenge. Mentors need to be approachable and actively responsive to the queries of their teams. They communicate through email using their official, registered email address, online conference calls (zoom/skype), or over the phone. Mentors and teams are also able to meet in person if it is possible.

Mentors can guide students through two ways:

1. By suggesting particular project(s) in the area of expertise of the mentor, which students can choose.
2. By mentoring students on projects that the students have devised themselves.

Examples of past project titles include 'a novel non-thrombogenic film for mechanical heart valves', 'therapeutic clothes for eczema', '3D printed uterus transplant for endometriosis', 'drug elucidating hydrogel dressing for enhanced wound healing', and 'a smart greenhouse approach for maximising root oxygen levels in food crop'.

Mentors contributing a particular project should also contribute some relevant literature links. By and large, the provided literature should be open-access. If a particular piece of literature is necessary to the project then the mentor

Landmine Monitor Report, 2009 *Special Report*, 1968 Routledge Handbook of Sports Event Management

Milena Parent, Jean-Loup Chappelet, 2017-07-14 From the Olympic Games to community level competitions sports events can be complex and pose a particular set of managerial challenges. The Routledge Handbook of Sports Event Management surveys the management of sports events around the world of every size and scale from small to mega events including one off and recurring events and single sport and multi sport events. The book adopts a unique stakeholder perspective structured around the groups and individuals who have an interest in and co create sports events including organising committees, promoters, sport organisations, spectators, community groups, sponsors, host governments, the media and NGOs. Each chapter addresses a specific stakeholder, defines that stakeholder and its relationships with sports events, describes the managerial requirements for a successful event, assesses current research and directions for future research and outlines the normative dimensions of stakeholder engagement such as sustainability and legacy. No other book takes such a broad view of sports event management surveying key theory, current research, best practice and moral and ethical considerations in one volume. With contributions from leading sport and event scholars from around the world, the Routledge Handbook of Sports Event Management is essential reading for any advanced student, researcher or professional with an interest in sport management, sport development, sport policy or events.
