EdPsych Modules Cheryl Cisero Durwin, Marla Reese-Weber, 2020-01-07 EdPsych Modules uses an innovative modular approach and case studies based on real life classroom situations to address the challenge of effectively connecting theory and research to practice. Succinct stand alone modules are organized into themed units and offer instructors the flexibility to tailor the book's contents to the needs of their course. The units begin with a set of case studies written for early childhood, elementary, middle and secondary classrooms providing students with direct insight into the dynamics influencing the future students they plan to teach. All 25 modules highlight diversity emphasizing how psychological factors adapt and change based on external influences such as sex, gender, race, language, disability status and socioeconomic background. The Fourth Edition includes over three hundred new references across all 25 modules and expanded coverage of diversity in new diversity related research. This title is accompanied by a complete teaching and learning package.

With this book, you'll take report cards to the next level integrating social, emotional learning and character development into any grading system. Resources include Guided exercises for analyzing existing report cards, Suggested report card designs, Tips on improving teacher-parent communication, Case studies, Testimonials from teachers and students.
