*Seeing the Spectrum* Robert Rozema, 2018 With 1 in 59 children being diagnosed with Autism Spectrum Disorder ASD odds are that students on the spectrum will be in many classrooms across every subject area Seeing the Spectrum argues that secondary English teachers are uniquely equipped to prepare students with autism for future success both in school and in life Writing for preservice and current English language arts teachers Robert Rozema offers practical evidenced based strategies for teaching literature informational texts writing and communication to students on the spectrum These strategies are appropriate for inclusive classrooms with both neurotypical students and students with autism The final chapter includes a complete unit plan on Of Mice and Men illustrating how curriculum focused on commonly taught literary works can be reimagined to accommodate the needs and draw on the strengths of students on the spectrum I appreciate this book I appreciate the gift Robert Rozema has given me My thinking and teaching will now be more diverse more consciously competent more compassionate and therefore more vital From the Foreword by Jeffrey D Wilhelm distinguished professor of English Education Boise State University and author of You Gotta BE the Book Seeing the Spectrum examines real young people and daily classroom interactions to help teachers better understand the mental and emotional processing of their autistic spectrum students and devise assignments to scaffold their success Rozema knows what matters in English reading literature developing empathy understanding complex ideas and interpersonal relationships writing to express complicated ideas The diverse tools strategies and ideas he describes foster inclusiveness compassion and success for all students Allen Webb professor of English Western Michigan University

## **Adolescent Literacy in the Academic Disciplines** Tamara L.

Jetton, Cynthia Shanahan, 2012-01-25 From leading authorities in both adolescent literacy and content area teaching this book addresses the particular challenges of literacy learning in each of the major academic disciplines Chapters focus on how to help students successfully engage with texts and ideas in English literature science math history and arts classrooms The book shows that while general strategies for reading informational texts are essential they are not enough students also need to learn processing strategies that are quite specific to each subject and its typical tasks or problems Vignettes from exemplary classrooms illustrate research based ways to build content area knowledge while targeting essential reading and writing skills

Breaking Images Brian Greer, David Kollosche, Ole Skovsmose, 2024-12-11 Mathematics is an activity something we do not just something inert that we study This rich collection begins from that premise to explore the various social influences institutional forces and lived realities that shape and mould the study and practice of mathematics and are moulded by it in turn These twenty one essays explore questions of mathematics as a topic of philosophy but also the nature and purpose of mathematics education and the role of mathematics in moulding citizens It challenges the biases and prejudices inherent within uninformed histories of mathematics including problems of white supremacy the denial of cultural difference and the global homogenization of teaching methods In particular the book contrasts the effectiveness of

mathematics and science in modelling physical phenomena and solving technical problems with its ineffectiveness in modelling social phenomena and solving human problems and urges us to consider how mathematics might better meet the urgent crises of our age The book addresses anybody who is interested in reflecting on the role of mathematics in society from different perspectives It allows mathematicians to ponder about the cultural connections of mathematics and provides new perspectives for philosophical sociological and cultural studies of mathematics Because of the book's emphasis on education in mathematics it is especially interesting for mathematics teachers and teacher educators to challenge their understanding of the subject *Learning to Teach English in the Secondary School* Jon Davison, Jane Dowson, 2009-05-12

How do you approach teaching English in the modern classroom What is expected of a would be English teacher This best selling textbook combines theory and practice to present a broad introduction to the opportunities and challenges of teaching English in secondary school classrooms Each chapter explains the background to debates about teaching the subject and provides tasks practical teaching approaches and further reading to explore issues and ideas in relation to school experience Already a major text for many university teacher education courses this new edition has been thoroughly updated in the light of recent revisions to the National Curriculum for English examination syllabuses and the Standards for Qualified Teacher Status As well as containing critical explorations of the history and definitions of the subject and policies such as the Secondary National Strategy that are appropriate to Professional and Masters level PGCE study other chapters present a broad range of effective innovative approaches to teaching such crucial areas as reading and writing speaking and listening drama media studies and information and communications technology grammar poetry and language study Shakespeare post 16 English language and literature Written particularly with the new and student teacher in mind this book offers principles and practical examples of teaching and learning within a 21st Century context in which new notions of literacy compete with demands of national assessment Taking these changing principles as a starting point the text also addresses questions about the nature of initial teacher preparation and raises issues concerning standards based teacher education mentoring in schools and monitoring the development of a student teacher
