Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set) Union of International Associations, 2014-06-16 Volume 1 A and B covers international organizations throughout the world comprising their aims activities and events

The Strategy of Terrorism Peter R. Neumann, M.L.R. Smith, 2007-10-18 This is the first book to set out a comprehensive framework by which to understand terrorism as strategy It contends that even terrorism of the supposedly nihilist variety can be viewed as a bona fide method for distributing means to fulfil the ends of policy that is as a strategy The main purpose of the work is to describe the dynamics of terrorism and evaluate their effectiveness as well as to theorize upon and clarify the correlation between political ends and terrorist means The text explains the modus operandi of terrorism and demonstrates how terrorism relies on manipulating the psychological impact of usually relatively small scale attacks Using a variety of case studies The Strategy of Terrorism shows how many campaigns of terrorism end in failure when they lose their power to terrify The authors spell out what a proper understanding of terrorism as a strategy implies for those who want to make terrorism ineffective and offer a number of policy recommendations derived directly from their critique This is the first contribution of strategic studies to the study of terrorism and will be of much interest to students of terrorism strategy and security studies as well as military professionals and policy makers

New Challenges in Economic Policy, Business, and Management Anna Ujwary-Gil, Marta Gancarczyk, 2020-01-01

The first part of this volume broadens the understanding of contemporary industrial policy in local regional national and international contexts The chapter by Wojnicka Sycz 2020 undertakes one of the most important challenges in RIS3 i e the evaluation of the impact of regional SS industries on the development of Polish regions Based on the spatial panel models for 2012 2017 she reveals the positive impact of SS industries employment dynamics on regional GDP per capita The chapter responds to the research gap in a direct measurement of how SS areas affect regional development The results provide the rationale for policy makers to pursue these strategies further The chapter contributes to regional New Industrial Policy by proving the efficiency of SS in strengthening regional performance Factors and barriers to the development of smart mobility in mediumsized Polish cities are the focus of the chapter by Kachniewska 2020 The author applies a comprehensive set of methods to tackle this issue and identifies the conditions for smart mobility drawing primarily on expert opinions The results enable a natural generalization of the identified determinants to the similar context of Polish towns the more important that the research on medium cities is much rarer than studies on metropolises This contribution belongs to the research streams of city governance and databased services which are closely connected to and dependent on industrial digital transformation Moreover smart mobility addresses the objective of environmental protection one of the crucial targets of NIP Godlewska Dziobo 2020 performs international comparisons between Central and Eastern European Countries in 2020 2018 Particularly she focuses on the sectoral transformation of the employment structure in these countries Besides the important observations of spatial dynamics in sectoral structures the chapter points to the increased importance of services relative to manufacturing in contemporary structural transformations Thus it justifies the expanded scope of New Industrial Policy that encompasses not only industry recently refreshed with 4 0 Revolution but also services particularly the digital ones The chapter by Czech 2020 identifies the impact of global debt on the national amounts outstanding of credit default swap contracts CDS in nonfinancial institutions She finds the dynamics of the CDS notional amounts outstanding in response to global household indebtedness and total non financial sector indebtedness in domestic banks This contribution brings valuable practical insights about the core and dynamics of CDS and their usefulness in alleviating risks in international exchange We find this input particularly relevant for industries and enterprises operating in global value chains Widera 2020 performs a spatial analysis of the induced population potential of the communes in the Opolska region in 2000 and 2018 The econometric analysis revealed both the own potential of the communes and the interactions with neighboring communes to develop this potential These findings are important to theorize about the bottom level sources of territorial units potential both internal and those stemming from spatial interactions We find these conclusions relevant to understand local level origins of regional transformations as well as interdependencies among local territorial units The next two parts of this volume present micro level and bottomup contexts for industrial policy Particularly these are the insights from management

and business research and from the research on governing various stakeholder interests and networks In the second part based on management and business theory and empirical evidence the authors discuss human resource and technological challenges faced by the contemporary industry Potoczek 2020 performs a bibliometric research to recognize the advancement of the process approach in organizations She finds the research on process improvement as emerging The major research community in that area belongs to the IT field while management researchers are still a minor group The author recommends the increased interest from the management field as conducive to the 4 0 transformation of organizational processes These results provide policy relevant input to the understanding of how academic research tackles digital transformation in organizational processes The chapter by Igielski 2020 uses a survey among a sample of large enterprise senior managers headquartered in Poland to check whether and how they develop employee skills for the challenges of Industry 4 0 The results are pessimistic since they reveal the lack of adaptive and developmental actions in this regard Nevertheless there is also a positive sign namely the awareness of the challenges posed by the 4 0 revolution Thus the chapter is valuable for the recommendations as to competence development in industrial transition to the digital economy Flak 2020 presents an interesting test for the system of organizational terms as to its usefulness in the practice of motivating people and in a dedicated software Based on a research experiment in real life business settings the author proves the applicability of theory driven organizational terms in software applications supporting managers in their motivating functions The chapter contributes important observations as to the interrelations among managerial and technological resources in motivating employees Sztorc 2020 investigates lean management tools at hotels in Poland based on a large sample of hotel representatives The results are helpful in understanding the types of lean management tools as well as their major targets in the researched organizations The input of the study rests in filling the research gap as to the particular tools of lean management applied in the hotel industry to improve services and processes The focus of this chapter on a particular industry provides a relevant basis for further application and upgrading of this service sector The chapter by Mazurkiewicz 2020 offers an assessment of the impact of national culture on career orientation and career values among Polish and Chinese students of economics Surprisingly the value system does not differ much between the two national samples despite the distinct characteristics of the two national cultures according to Hofstede s method Consequently the author assumes national culture as moderator of career values rather than their determinant These results provide a contribution to the understanding of job motivations among future corporate employees a critical determinant of all industrial transitions Kowalik 2020 investigates the economic benefits perceived by student participants of scientific projects Based on the survey the author reveals students recognition of scientific projects as bringing economic effects The study offers practical implications for young people engaging in research activities as well as for research policy that might acknowledge additional important outcomes besides purely scientific objectives The third part discusses how governing networks and

interests can ensure sustainable and socially responsible industries and enterprises Sectoral and industrial collaborations are supposed to enhance industrial convergence EOCIC 2019 In this vein Lis 2020 focuses on collaborative attitudes in clusters and technological parks Cluster organizations are established to rip the localization and agglomeration economies as well as synergies from cooperative links Despite some history of operations the surveyed Polish cluster initiatives and technology parks still reveal low development of enterprise cooperation The author suggests self evaluation of management and participants of the researched organizations to understand the accomplished level of collaboration and derive practical implications This contribution is important to understand the performance of some organizational measures of industrial policy and their real input to industrial transformation The chapter by Kowalczyk 2020 investigates sociocultural conditions of CSR practices in the construction industry of selected European countries Based on a survey with a large convenience sample the author confirms the strength of stakeholder pressure on CSR practice as well as the mediating role of company culture in this relationship At the same time country differences were indicated as significant for CSR practice and worth further explanation of its variance This study is valuable for the explanation of interests and stakeholder pressure affecting a particular industry thus determining the development conditions of that industry Another industry specific study has been proposed by Kurzak Mabrouk 2020 who focuses on food businesses This chapter addresses the critical strategic direction of NIP that refers to sustainable and responsible growth with regard to environmental protection The author performed the interviews with top and middle managers of a large representative sample of Polish food companies The findings are optimistic since the majority of companies undertake the efforts towards comprehensive sustainable development strategies voluntarily and not only due to legal enforcement Still the researched enterprises do not fully apply these strategies as yet Resonating with the study by Lis 2020 Flieger 2020 identifies network types according to the collaboration maturity level in a local government unit The research on collaborative networks in public organizations still remains unique Therefore this study fills the research gap The author uses a casebased approach to identify the network features that change according to the maturity level of relationships The findings are useful for the practice of developing collaboration in local governments and contribute to our understanding of the context for industrial development **The Commonwealth Yearbook**
