## **Cooking Technology Transformations Culinary Practice:**

*Cooking Technology* ,2015 *Cooking Technology* Steffan Igor Ayora-Diaz,2015-12-17 New scientific discoveries technologies and techniques often find their way into the space and equipment of domestic and professional kitchens Using approaches based on anthropology archaeology and history Cooking Technology reveals the impact these and the associated broader socio cultural political and economic changes have on everyday culinary practices explaining why people transform or indeed refuse to change their kitchens and food habits Focusing on Mexico and Latin America the authors look at poor rural households as well as the kitchens of the well to do and professional chefs Topics range from state subsidies for traditional ingredients to the promotion of fusion foods and the meaning of kitchens and cooking in different localities as a result of people taking their cooking technologies and ingredients with them to recreate their kitchens abroad What emerges is an image of Latin American kitchens as places where traditional and modern culinary values are constantly being renegotiated The thirteen chapters feature case studies of areas in Mexico the American Mexican border Cuba Guatemala Costa Rica Venezuela Colombia Peru and Brazil With contributions from an international range of leading experts Cooking Technology fills an important gap in the literature and provides an excellent introduction to the topic for students and researchers working in food studies anthropology history and Latin American studies

## **Routledge Handbook of Food**

**and Cultural Heritage** Michael A. Di Giovine,Raúl Matta,2025-09-24 The Routledge Handbook of Food and Cultural Heritage explores the many varied intersections of food and cultural heritage from a robust transdisciplinary perspective Innovative in its approach this cutting edge Handbook thinks beyond traditional boundaries to present unique perspectives on the myriad ways in which food and cultural heritage are entangled in theory and practice Both are growing industries both are deeply rooted in families cultures and societies both generate controversy and are deployed for political and economic activism They also both have intellectual lives of their own and are centers of interdisciplinary fields themselves yet they also intersect in interesting and until this book under theorized ways After a comprehensive introduction that presents and challenges the state of the art in the disciplines of critical food and critical heritage studies the Handbook's chapters are divided into six themes common to both fields Ontologies and epistemologies of food and cultural heritage material culture identity placemaking and belonging politics and regulation tourism development and heritage management and contemporary issues and emerging approaches To give representation of voices not usually heard in the scholarly tradition special interviews with food and heritage practitioners complement the comprehensive chapters adding further depth to the volume through their own lived experiences With contributions from nearly 50 internationally recognized scholars social scientists dieticians practitioners and activists this book is essential reading to scholars students researchers industry professionals and practitioners looking to understand the complex and compelling ways in which food foodways and cultural heritage overlap and impact each other providing venues for collaborations

## **Microhistories of Technology** Mikael

Hård, 2023-02-20 In this open access book Mikael Hård tells a story of how people around the world challenged the production techniques and products brought by globalization. Retaining their autonomy and freedom creative individuals selectively adopted or rejected modern gadgets tools and machines. In standard historical narratives globalization is portrayed as an unstoppable force that flattens all obstacles in its path. Modern technology is also seen as inexorable in the nineteenth century steamships telegraph lines and Gatling guns are said to have paved the way for colonialism and other forms of dominating people and societies. Later shipping containers and computer networks purportedly pulled the planet deeper into a maelstrom of capitalism. Hård discusses instances that push back against these narratives. For example in Soviet times inhabitants of Samarkand Uzbekistan preferred to remain in and expand their own mud brick houses rather than move into prefabricated concrete residential buildings. Similarly nineteenth century Sumatran carpenters ignored the saws brought to them by missionaries and chose to chop down trees with their arch bladed adzes. And people in colonial India successfully competed with capitalist run Caribbean sugar plantations continuing to produce their own muscovado and sell it to local consumers. This book invites readers to view the history of technology and material culture through the lens of diversity. Based on research funded by the European Research Council and conducted in the Global South Microhistories of Technology Making the World shows that the spread of modern technologies did not erase artisanal production methods and traditional tools.

Food, Culture and Identity in the Neolithic and Early Bronze Age Michael Parker Pearson, 2003

Archaeology literally feeds on the residues and discarded remains of our ancestors meals. Such material has spawned a vast field of research and scientific techniques looking at prehistoric diet and food so that we can now learn more about the residues found stuck to the bottom of a Bronze Age pot than what is at the bottom of our own freezers.
