*Natural Products and Drug Discovery* Subhash C. Mandal, Vivekananda Mandal, Tetsuya Konishi, 2018-02-16 *Natural Products and Drug Discovery An Integrated Approach* provides an applied overview of the field from traditional medicinal targets to cutting edge molecular techniques. Natural products have always been of key importance to drug discovery but as modern techniques and technologies have allowed researchers to identify, isolate, extract and synthesize their active compounds in new ways they are once again coming to the forefront of drug discovery. Combining the potential of traditional medicine with the refinement of modern chemical technology the use of natural products as the basis for drugs can help in the development of more environmentally sound, economical and effective drug discovery processes. *Natural Products Drug Discovery An Integrated Approach* reflects on the current changes in this field giving context to the current shift and using supportive case studies to highlight the challenges and successes faced by researchers in integrating traditional medicinal sources with modern chemical technologies. It therefore acts as a useful reference to medicinal chemists, phytochemists, biochemists, pharma R D professionals and drug discovery students and researchers. Reviews the changing role of natural products in drug discovery integrating traditional knowledge with modern molecular technologies. Highlights the potential future role of natural products in preventative medicine. Supported by real world case studies throughout. **Quality**

**Control and Evaluation of Herbal Drugs** Pulok K. Mukherjee, 2019-05-30 *Quality Control and Evaluation of Herbal Drugs* brings together current thinking and practices for evaluation of natural products and traditional medicines. The use of herbal medicine in therapeutics is on the rise in both developed and developing countries and this book facilitates the necessary development of quality standards for these medicines. This book elucidates on various challenges and opportunities for quality evaluation of herbal drugs with several integrated approaches including metabolomics, chemoprofiling, marker analysis, stability testing, good practices for manufacturing, clinical aspects, Ethnopharmacology and Ethnomedicine inspired drug development. Written by Prof Pulok K Mukherjee, a leader in this field, the book highlights on various methods, techniques and approaches for evaluating the purity, quality, safety and efficacy of herbal drugs. Particular attention is paid to methods that assess these drugs' activity, the compounds responsible and their underlying mechanisms of action. The book describes the quality control parameters followed in India and other countries including Japan, China, Bangladesh and other Asian countries as well as the regulatory profiles of the European Union and North America. This book will be useful in bio prospecting of natural products and traditional medicine inspired drug discovery and development. Provides new information on the research and development of natural remedies, essential reading on the study and use of natural resources for preventative or healing purposes. Brings together current thinking and practices in quality control and standardization of herbal drugs highlighting several integrated approaches for metabolomics, chemo profiling and marker analysis. Aids in developing knowledge of various techniques including macroscopy, microscopy, HPTLC, HPLC, LC, MS, GC, MS etc with the

development of integrated methods for evaluation of botanicals used in traditional medicine Assessment of herbal drugs through bio analytical techniques bioassay guided isolation enzyme inhibition pharmacological microbiological antiviral assays and safety related quality issues References global organizations such as the WHO USFDA CDSCO AYUSH TCM and others to serve as a comprehensive document for enforcement agencies NGOs and regulatory authorities Pharmacognosy and Phytochemistry Uchenna E. Odoh, Shailendra S. Gurav, Michael O. Chukwuma, 2025-03-18 Key information on plant based chemical and pharmacology research from basics and principles through recent technological advances Pharmacognosy and Phytochemistry provides an overview of the basics of pharmacognosy and phytochemistry from early principles through contemporary advances like molecular pharmacognosy The book covers the classification of crude drugs complementary and alternative medical CAM systems adulteration and evaluation of drugs extraction methods of plant drugs and ethnobotany and ethnopharmacology The book also reviews the historical overview therapeutic application cultural and ecological dimensions of plant based medicines Other key chapters discuss biotechnology and clinical pharmacognosy Written by a group of expert contributors Pharmacognosy and Phytochemistry reviews sample topics including Methodologies for extracting bioactive compounds and techniques to perform qualitative and quantitative phytochemical analysis Therapeutic potential of plant secondary metabolites and the processes of isolation purification and characterization of herbal drugs Biological screening methods and biosynthetic pathways of phytopharmaceuticals pharmaceutical aids nutraceuticals cosmeceuticals pesticides and allergens Comparative phytochemistry chemotaxonomy and the emerging field of marine pharmacognosy Combining traditional knowledge with modern advancements to provide a holistic understanding of two important fields Pharmacognosy and Phytochemistry serves as an excellent resource for students researchers and practitioners *Handbook of Asian Rosewoods* Rekha R. Warriar, Geeta Joshi, A. N. Arunkumar, 2025-11-10 This book explores the different types of rosewoods found in the Asian region with a particular focus on some of the most exploited Dalbergias It includes comprehensive information on the taxonomy species biology population structure threat status and trade and conservation management measures to protect different rosewoods in Asia This book also provides an in depth overview of the current information available on the different species of Dalbergia especially CITES listed contributing to the identification of the gaps in our current knowledge and understanding about the efforts taken to address these gaps The book can be a beneficial reference for policy makers tropical tree breeders and researchers students and scholars **The Response of Microalgae and Plankton to Climate Change and Human Activities** Zhaohe Luo, Yanpei Zhuang, Kieng Soon Hii, Hala F. Mohamed, 2024-02-07 The majority of global seafood production and mariculture activities take place in marine coastal water bodies especially in areas of high primary productivity from microalgae and plankton This productivity sustains many forms of ecosystem services and promotes carbon dioxide absorption However climate change ocean warming acidification oxygen loss etc and anthropogenic disturbances nutrients intrusion aquaculture have influenced the microalgae

plankton community assemblage and shifted it into a highly productive zone causing a severe impact on the marine ecosystem such as an increase in Harmful Algal Blooms dead zone expansions and coral algal phase shifts So far there is still little knowledge on the mechanisms of microalgae plankton community response to these changing environmental conditions Harmful microalgae impair the marine ecosystem through the production of the so called shellfish toxins which cause shellfish contamination and poisoning to the vertebrates including humans In addition some microalgae produce fish killing toxins ichthyotoxins causing increasing damage to marine aquaculture Besides that the high productivity bloom of microalgae in the water due to coastal eutrophication from anthropogenic activities is known to induce hypoxic anoxic conditions causing a severe economic impact on aquaculture Community Series-Extremophiles: Microbial Genomics and Taxogenomics, Volume II Rafael R. de la Haba, André Antunes, Brian P. Hedlund, Mohamed Jebbar, 2024-02-08 This Research

Topic is the second volume of the Community series Extremophiles Microbial Genomics and Taxogenomics Please see the first volume here Extreme habitats exist across the globe and span over three quarters of our planet They can be widely different from a physical chemical perspective as they include diverse types of extreme such as temperature pH salinity radiation pressure low water activity low nutrient availability etc Organisms capable of adjusting surviving or thriving in those habitats which are so hostile that they were previously thought to be adverse or lethal for life are called extremophiles
