Manual of Allergy and Clinical Immunology for Otolaryngologists David L. Rosenstreich, Marvin P. Fried, Gabriele S. de Vos, Alexis H. Jackman, 2015-09-30 Manual of Allergy and Clinical Immunology for Otolaryngologists presents the most up to date knowledge related to allergy and immunology directed towards the unique needs of otolaryngologists. Many of the clinical conditions treated by otolaryngologists have an allergic or immunologic pathogenesis including sinusitis, rhinitis and otitis, and otolaryngologists are often required to use allergic methodology in treating these problems. This book is a resource to which physicians can refer to help them manage allergic aspects of common ENT problems and their diagnosis and management. Manual of Allergy and Clinical Immunology for Otolaryngologists begins with an introduction to the fundamental immunologic processes necessary to understand allergic mechanism and diseases and goes on to include food and drug allergies, anaphylaxis, immune deficiencies, occupational allergic diseases and tumor immunology among other topics. Otolaryngologists across all specialties as well as residents will benefit from the current information that focuses on the most important aspects of each topic in a concise, easy to reference format.
