Math Pacing Guide Las Cruces Public Schools

Understanding Mathematics: The standards define what students should understand and be able to do in their study of mathematics. Asking a student to understand something means asking a teacher to assess whether the student has understood it. "Mathematical understanding and procedural skill are equally important."

Description of the Pacing Guide: A pacing guide is an interval-based description of what teachers teach in a particular grade or course; the order in which it is taught, and the amount of time dedicated to teaching the content.

Purpose of a Pacing Guide: The purpose of a pacing guide is to ensure that all of the standards are addressed during the academic year. Each pacing guide is nine weeks in duration.

Components of the Pacing Guide:

- **Critical Areas:** Each grade level has identified Critical Areas. These areas are woven throughout the standards and should receive additional time and attention.
- **Mathematical Practice Standards (8):** Based on the NCTM Process Standards, these standards describe the variety of "processes and proficiencies" students should master while working with the Grade Level Content Standards.
- **Domains:** are larger groups of related Content Standards. Standards from different domains may sometimes be closely related.
- **Clusters:** are groups of related standards. Note that standards from different clusters may sometimes be closely related, because mathematics is a connected subject.
- **Grade level standards:** define what students should know and be able to do by the end of each grade level.
- **Unpacked standards:** provide a clear picture for the teacher as he/she implements the CCSS.
- **Resources:**—includes but not limited to current district core resources.

Teacher Perception of Pacing Guide Use in the Secondary Classroom Donna Michele Smith Turner,2015

Historically teachers have exercised considerable autonomy in the day to day learning that occurs in their classrooms Now it is growing increasingly rare for a teacher to experience this type of professional freedom In response to high stakes testing national and state academic content standards and most recently the common core standards pacing guides are one of the more recent devices schools are using to implement and monitor curriculum The purpose of this research project is to investigate teacher opinion toward these pacing guides An online survey called the Pacing Guide Survey was delivered to secondary regular and special education teachers in core subject areas of mathematics science social studies and language arts The teachers were asked about whether or not they use pacing guides their attitude and comfort level in using pacing guides as well as information concerning the population of their high school such as demographics enrollment and single or multiple high schools Building level factors such as professional development initiatives methods of curriculum monitoring and pacing guide development and revisions processes teacher factors such as years teaching years using pacing guides confidence in content area and educational background Administrators were also interviewed to form a complete picture of pacing guide development and implementation in the secondary education environment Quantitative data were analyzed using bivariate Spearman's rank order correlation and qualitative data were analyzed using a combination of thematic data analysis and quasi statistical methods Recommendations based on the data collected are Teachers should be provided with the flexibility to address student needs in the classroom Teacher input into pacing guide development implementation and revision process is necessary to ensure that student needs are addressed Team autonomy is key and teacher teams need to be provided with the necessary support structure to provide meaningful learning experiences for their students

Reading for Understanding Ruth Schoenbach, Cynthia

Greenleaf, Lynn Murphy, 2012-07-03. As elegantly practical as it is theoretically elegant, it is a guided tour as one examines the tools of expert teachers as they engage students in a journey that is aptly dubbed Reading Apprenticeship, learning how to become a savvy strategic reader under the tutelage of thoughtful, caring, and demanding teachers. P. David Pearson, University of California Berkeley, and founding editor of the *Handbook of Reading Research*. *Reading for Understanding* is a monumental achievement. It was a monumental achievement when it came out as a first edition in 1999, bringing years of rigorous reading research together in a framework for teaching that made sense in actual secondary school classrooms. Now just thirteen years later, Schoenbach and Greenleaf have several randomized clinical trials and multiple on-going studies at their fingertips to demonstrate the effects of this approach for developing the reading and thinking of young people in our nation's middle and high school classrooms as well as in community college classrooms. Their careful work on developing disciplinary literacy among all students represents a passion for and commitment to supporting students and their teachers in reading for understanding, which translates to reading for enjoyment, self-awareness, learning, and for purposeful and informed action in our society. Elizabeth Moje, Arthur F. Thurnau Professor and Associate Dean for Research, School of Education, University of Michigan. Reading Apprenticeship has proven to be an inspiration to Renton Technical College faculty and students alike. They have learned together to view themselves as readers in transformative ways as they embrace powerful techniques to increase reading comprehension. The ideas and strategies in *Reading for Understanding* anchor this new and broad-based energy around reading and an enthusiasm among our faculty to model effective reading strategies for our students. Steve Hanson, President, Renton Technical College, Renton, Washington. *Reading for Understanding* has the finest blend I have seen of research strategies and classroom vignettes to deepen teacher learning and help them connect the dots between theory and practice. Curtis Refior, Content Area Literacy Coach, Fowlerville Community Schools, Fowlerville, Michigan. A teacher tested, research-based resource for dramatically improving reading skills. Published in partnership with WestEd, this significantly updated second edition of the bestselling book contains strategies for helping students in middle school through community college gain the reading independence to master subject area textbooks and other material. Based on the Reading Apprenticeship program, which three rigorous gold standard research studies have shown to be effective in raising students' reading achievement. Presents a clear framework for improving the reading and subject area learning of all students, including English learners, students with special needs, as well as those in honors and AP courses. Provides concrete tools for

classroom use and examples from a range of classrooms Presents a clear how to for teachers implementing the subject area literacies of the Common Core Standards Reading for Understanding proves it's never too late for teachers and students to work together to boost literacy engagement and achievement **Yes, No, Maybe So** Jenna Kaye Lindsey,2008
