Sense-making: Problematizing

Constructs of Literacy for 21st Century Education Marilyn J. Narey,Kelli Jo Kerry-Moran,2021-03-15 This book is a rich yet highly accessible volume that details an exciting and much needed inquiry into the notion of literacy what it is why it is and how it might be framed most effectively for 21st century education The chapters unfold in a creative interplay of practice and theory Narey s insightful questioning into the socio historical cultural implications of literacy as empowerment establishes the critical context while Kerry Moran s examination of the burgeoning literacy landscape reveals challenges for teacher education Drawing upon classic and cutting edge theories Narey builds a provocative and powerful case for a 21st century construct of literacy as sense making sense as relative to the senses i e sight hearing and sense as making meaning Her innovative model of the literacy event opens up a range of potential foci for analysis and facilitates her teasing out of two

critical areas for instruction sensory perception and aesthetic knowledge This theoretical sense making lens is applied to Kerry Moran's teacher education classroom as the authors reflect upon further development As a timely original and thought provoking work this slim volume of big ideas promises to be a valuable resource for teacher educators and other scholars who seek a clear and cohesive frame for literacy in 21st century education This is a very well written scholarly text that provides a new and important theory of 21st century literacy Narey's sketches of literacy as sense making are laid out in logical form building upon researched and referenced sources to ground her ideas and offering the reader information examples and new insights In addition to providing many significant perspectives underpinning her new theory Narey provides excellent historical and current explanations about literacy from highly respected researchers in the field The inclusion of a practical application of Narey's conceptual theoretical framework to Kerry Moran's example of an instructional unit in a teacher education course is helpful to understanding the theory in practice The references throughout the work are extensive comprehensive and very well documented This text Sense making Problematizing Constructs of Literacy for 21st Century Education contributes original thinking to the field of literacy and learning and would be an excellent resource for literacy and language professors or instructors in a post graduate or professional development program Penny Silvers
