High School Social Studies and the Common Core: An Action Research Project Nicholas Heath, 2016 This qualitative action research project involved a group of 17 social studies teachers in four course subjects world history U S history government and economics developing a set of literacy enhancing lessons to better understand how the Common Core will impact their instruction from now on This social studies department like many others in the state has not had any formal training in how the Common Core s emphasis on literacy skills will work in their classes Due to this lack of training in house action research was selected as the best approach to their professional development Building off the collective knowledge of each other the teachers went through a cycle of inquiry designed to identify a problem model possible solutions or lessons intervene in their classrooms with Common Core aligned lessons and evaluate how it all worked out Data were collected via survey documentation observation and interview Evidence was triangulated between collection methods to identify how well the teachers understood the role of the Common Core in their own lessons what factors were promoting that understanding and what factors were hindering that understanding In this study it was found that the teachers still do not fully understand how to create lessons well aligned to the expectations of the Common Core Their strong collaborative culture accountability to each other and motivation to change are helping them however The teachers still need to be able to overcome a lack of knowledge about the Common Core a lack of resources to build that knowledge and a lack of time to do this work This action research project did though get them set on a path towards successful adoption of Common Core aligned pedagogy

A Guided Inquiry Approach to Teaching the Humanities Research Project Randell K. Schmidt, Emilia N. Giordano, Geoffrey M. Schmidt, 2015-08-26 Aligned with the Common Core this book enables teachers and librarians to develop lessons and workshops as well as to teach high school students how to research and write a humanities paper using a guided inquiry approach Being able to use the inquiry process to successfully research write and prepare papers and others

types of presentations is not only necessary for a student's preparation for collegiate work but is truly a requisite life skill. This book provides a solid guided inquiry curriculum for cultivating the skills needed to properly investigate a subject in the humanities: interrogate both textual and non-textual sources, interpret the information, develop an understanding of the topic, and effectively communicate one's findings. It is a powerful and practical guide for high school humanities teachers, school librarians, community college humanities teachers and librarians, and early college level humanities instructors, as well as for high school and college students who want to learn how to conduct and write up humanities research. Part one comprises a teacher's practicum that explains the power of guided inquiry. Part two contains student's workshops with instructions and materials to conduct a guided humanities project and paper on the high school level. The third part provides materials for a professional development session for this assignment, as well as assessment tools and other supplementary materials such as student handouts. Based on the author's 15 years experience in teaching guided inquiry, the 20 workshops in the book use a step-by-step constructivist strategy for teaching a sophisticated humanities project that enables college readiness.

Social Studies for Secondary Schools Alan J. Singer, 2014-10-08 Now in its 4th edition, this popular text for secondary social studies methods courses integrates discussions of educational goals and the nature of history and social studies with ideas for organizing social studies curricula, units, lessons, projects, and activities. A major theme throughout is that what teachers choose to teach and the way they teach reflect their broader understanding of society, history, and the purpose of social studies education. Advocating an inquiry and activity-based view of social studies teaching that respects the points of view of students and teachers and based in practice and experience, it offers systematic support and open, honest advice for new teachers. Each chapter addresses a broad question about social studies education; sub-chapters begin with narrower questions that direct attention to specific educational issues. Lesson ideas and materials in the book and online are especially designed to help new teachers to address common core learning standards to work in inclusive settings and to promote literacy and the use of technology in social studies classrooms. Chapters include highlighted Learning Activities, Teaching Activities, and Classroom Activities designed to provoke discussion and illustrate different approaches to teaching social studies, and conclude with recommendations for further reading and links to online essays about related social studies topics. Activities are followed by four categories: Think it over, Add your voice to the discussion, Try it yourself, and It's your classroom. All of these are supported with online teaching material. Designed for undergraduate and graduate pre-service social studies methods courses, this text is also useful for in-service training programs as a reference for
