Math & Science for Young

Children Rosalind Charlesworth, Karen Lind, 2007 Math and Science for Young Children 5e is a unique reference that focuses on the integration of math and science with the other important areas of child development during the crucial birth through eight age range. It also carefully addresses the ever changing and significant national standards of the following organizations: The National Association for the Education of Young Children (NAEYC), National Council of Teachers of Math (NCTM), National Science Teachers Association (NSTA), American Association for the Advancement of Science (AAAS) and the National Research Council (NRC). A valuable resource for the student learner, working professional as well as the involved parent. Math and Science for Young Children 5e is the most current volume of information of its kind available on the market today.

Experiences in Math for Young Children Rosalind Charlesworth, 1991. This text focuses on the developmental sequence of mathematics for young children and its integration with other parts of the curriculum. For each math concept presented, the author explains how it might be incorporated into music and movement, language and visual arts, science and social studies for children from birth through age eight. Problem solving is promoted as the major means for constructing concepts with a balance of naturalistic informal and structured activities. The content is compatible with national standards and guidelines, giving educators the tools they need to prepare children to meet these standards. Each concept unit contains assessment, instructional and evaluation strategies that educators can employ immediately. Further resources include active approaches to mathematics, resources for establishing learning centers, guidance on parental involvement, lists of children's books with math concepts and related Web sites.

Math and Science for Young Children Rosalind Charlesworth, Karen Lind, 1990. Math and Science for Young Children 4E focuses on the integration of mathematics and science with the other content areas for children from birth through age eight. Based on theories of child development and learning, the book is compatible with the guidelines and standards of major national professional organizations. Mathematics and science concepts are related to national standards and present a common framework for inclusion with music and movement, language arts, visual arts, science and social studies activities. Developmentally appropriate instructional and assessment practice is stressed and each concept unit includes assessment, instructional and evaluation strategies. Technology and Web resources are also provided.
