Reaves,2023-03-31 This book provides an in depth look at pragmatic development by second language learners of French
through their production of French discourse markers It showcases a holistic production focused approach designed to
provide a broad picture of learner discourse marker use in French The book begins with a comprehensive description of the
major theoretical frameworks in discourse marker research It provides a detailed analysis of prior second language research
on discourse markers in several languages and the dominant avenues of inquiry Additionally this book engages in a
discussion of methodology that can serve as a guide for future researchers on the topic The data presented in this book
provide a broad picture of both native speaker and learner production of discourse markers with implications for theoretical
and formal understandings of pragmatic meaning This book will be of particular interest to scholars in pragmatics for both
second language acquisition and formal or theoretical perspectives 阳阳 Yang Zhao,2006 **Interfaces and**

Features in Second Language Acquisition Jia Wang,2023-02-11 This book presents comprehensive and rigorous research
on the acquisition of Chinese negation by L1 English and L1 Korean learners within the theoretical framework of the
Interface Hypothesis and the Feature Reassembly Hypothesis The results from grammaticality judgment data N 182 and
learner corpus data overall scale 15 19 million characters reveal multiple factors contributing to the variability in L2
acquisition at the interfaces involved with Chinese negative structures including L1 influence the quantity input frequency
and the quality of the target input input consistency and regularity as well as L2 proficiency These factors also underlie the
detectability and reassembly of the realis features encoded with bu and mei the two primary negation markers in Mandarin

Chinese in different licensing contexts Task modality written vs aural seems to play a role in L2 learners access to explicit and implicit knowledge about Chinese negation but the effect of task modality is constrained by other factors such as structural feature complexity L2 proficiency and L1 L2 similarity The approach of employing both elicited experimental data and authentic learner corpus data furnishes new evidence for the acquisition Chinese negation by L2 learners The findings of this study are of significance to the examination of the Interface Hypothesis and the Feature Reassembly Hypothesis in generative oriented SLA research
