The Non-Technical Founder Josh MacDonald, 2018-04-03 Everyone has an idea that they think is the next big thing. The problem is it's probably an app or software idea and most people probably don't know how to code and their record for managing programmers is little to none. Even if they do know how to code they're not quite sure how to get their first one thousand customers. The Non-Technical Founder walks readers through the stages of validating whether their next big thing is good, bringing the idea to life and getting those first customers.

Film Authorship in Contemporary Transmedia Culture Wikanda Promkhuntong, 2025-10-01 Film Authorship in Contemporary Transmedia Culture: The Paratextual Lives of Asian Auteurs examines film authorship in the transmedia era whereby film directors have become public figures through a wide range of textual material and performative practices. The book draws on the notion of paratext and its related term palimpsest to bring forth the idea of self-reflexive authorship as a method of examining the mediated past, present and afterlife of East Asian filmmakers. The first part of the book pays attention to materials surrounding film festivals, multi-platform distribution and cinephile fan creative practices which have been created, rewritten and shared to foster and problematize the reputations of selected filmmakers. The second part examines alternative modes of self-projections and creative productions that address the filmmakers' sense of selves and relations with the industry and the public. Across different chapters, discourses surrounding film authorship and East Asian cinema are revisited and expanded to highlight its multiple histories and possible futures.

The Cryptopians Laura Shin, 2022-02-22 The story of the idealists, technologists and opportunists fighting to bring cryptocurrency to the masses. In their short history, Bitcoin and other cryptocurrencies have gone through booms, busts and internecine wars, recently reaching a market valuation of more than 2 trillion. The central promise of crypto endures: vast fortunes made from decentralized networks not controlled by any single entity and not yet regulated by many governments. The recent growth of crypto would have been all but impossible if not for a brilliant young man named Vitalik Buterin and his creation, Ethereum. In this book, Laura Shin takes readers inside the founding of this novel cryptocurrency network which enabled users to launch their own new coins, thus creating a new crypto fever. She introduces readers to larger-than-life characters like Buterin, the Web3 wunderkind, his short-lived CEO Charles Hoskinson and Joe Lubin, a former Goldman Sachs VP who became one of crypto's most well-known billionaires. Sparks fly as these outsized personalities fight for their piece of a seemingly limitless new business opportunity. This fascinating book shows the crypto market for what it really is: a deeply personal struggle to influence the coming revolution in money, culture and power.

Against the State James Stout, 2026-01-20 A book about those that cannot wait any longer for the world to change. Young revolutionaries in Myanmar and Rojava colloquially referred to by journalist James Stout as anarchists for their non-hierarchical forms of organization based on mutual aid and solidarity face incredible danger to pursue their expression of freedom. *Against the State* seeks to understand these anarchists, to honor their struggles and ask tough questions about

confronting the state Stout contrasts these contemporary movements with the Spanish Civil War and Revolution where workers in 1936 fought capitalism and fascism Crucially the book presents these movements as evolving and innovative and centers the voices of those too often overlooked in conflict studies and misunderstood by Western radical movements

Gaming Democracy Adrienne L. Massanari, 2024-10-29 How play and gaming culture have mainstreamed far right ideology through social media platforms From Gamergate to the ongoing Big Lie the far right has gone mainstream In *Gaming Democracy* Adrienne Massanari tracks the flames of toxicity found in the far right and alt right movements as they increasingly take up oxygen in American and global society In this pathbreaking contribution to the fields of internet studies game studies and gender studies Massanari argues that Silicon Valley's emphasis on meritocracy and free speech absolutism has driven this rightward slide These ideologies have been coded into social media spaces that implicitly silence marginalized communities and subject them to rampant abuse by groups that have learned to game the ecology of platforms algorithms and attention economies While populist movements are not new phenomena such as QAnon parental rights activism and COVID denialism are uniquely of the internet with supporters demonstrating both technical acumen and an ability to use memes and play as a way of both building community and fomenting dissent Massanari explores the ways that the far right uses memetic humor and geek masculinity as tools both to create a sense of community within these leaderless groups and to obfuscate their intentions Using the lens of play and game studies as well as the concept of metagaming *Gaming Democracy* is a novel contribution to our understanding of online platforms and far right political activism
