Research Handbook on Communicating Climate Change David C. Holmes, Lucy M. Richardson, 2020-12-25 Drawing together key frameworks and disciplines that illuminate the importance of communication around climate change this Research Handbook offers a vital knowledge base to address the urgency of conveying climate issues to a variety of audiences

Cli-Fi and Class Debra J. Rosenthal, Jason de Lara Molesky, 2023-10-09 Since its emergence in the late twentieth century climate fiction or cli fi has concerned itself as much with economic injustice and popular revolt as with rising seas and soaring temperatures Indeed with its insistent focus on redressing social disparities cli fi might reasonably be classified as a form of protest literature As environmental crises escalate and inequality intensifies literary writers and scholars alike have increasingly scrutinized the dual exploitations of the earth's ecosystems and the socioeconomically disadvantaged Cli Fi and Class focuses on the representation of class dynamics in climate change narratives With fifteen essays on the intersection of the economic and the ecological addressing works ranging from the novels of Joseph Conrad Cormac McCarthy and Octavia Butler to the film *Black Panther* and the Broadway musical *Hadestown* this collection unpacks the complex ways economic exploitation impacts planetary well being and the ways climatic change shapes those inequities in turn

Narrating Multiplicities in Motion Elena Ogliari, Anna Pasolini, Carla Tempestoso, 2025-11-10 *Narrating Multiplicities in Motion* brings together a dynamic collection of interdisciplinary essays that explore storytelling as a powerful tool for resisting dominant narratives and imagining equitable futures Grounded in Cultural Studies English and Anglophone Literature and Linguistics the volume examines how narrative practices reframe identity challenge systemic inequalities and foster interconnectedness between human and more than human beings Through analyses of speculative fiction postcolonial narratives feminist reimaginings and contemporary media contributors investigate how stories reshape our understanding of bodies spaces and subjectivities Whether through the subversive humour of a contemporary TV anti heroine the reconfiguration of colonial pasts in Africanfuturist fiction or the embodied resistance found in post apocalyptic landscapes *Narrating Multiplicities in Motion* invites readers to engage with storytelling not merely as reflection but as political action In an age marked by crisis and uncertainty it reaffirms narrative as a site of resistance responsibility and radical possibility

Green Matters, 2019-11-26 *Green Matters* offers a fascinating insight into the regenerative function of literature with regard to environmental concerns Based on recent developments in ecocriticism the book demonstrates how the aesthetic dimension of literary texts makes them a vital force in the struggle for sustainable futures Applying this understanding to individual works from a number of different thematic fields cultural contexts and literary genres *Green Matters* presents novel approaches to the manifold ways in which literature can make a difference While the first sections of the book highlight the transnational the focus on Canada in the last section allows a more specific exploration of how themes genres and literary forms develop their own manifestations within a national context Through its unifying ecocultural focus

and its variegated approaches the volume is an essential contribution to contemporary environmental humanities
