Chapter 5 Energy Test:

The Energy of Data and Distance Correlation Gabor J. Szekely, Maria L. Rizzo, 2023-02-15 Energy distance is a statistical distance between the distributions of random vectors which characterizes equality of distributions The name energy derives from Newton's gravitational potential energy and there is an elegant relation to the notion of potential energy between statistical observations Energy statistics are functions of distances between statistical observations in metric spaces The authors hope this book will spark the interest of most statisticians who so far have not explored E statistics and would like to apply these new methods using R The Energy of Data and Distance Correlation is intended for teachers and students looking for dedicated material on energy statistics but can serve as a supplement to a wide range of courses and areas such as Monte Carlo methods U statistics or V statistics measures of multivariate dependence goodness of fit tests nonparametric methods and distance based methods E statistics provides powerful methods to deal with problems in multivariate inference and analysis Methods are implemented in R and readers can immediately apply them using the freely available energy package for R The proposed book will provide an overview of the existing state of the art in development of energy statistics and an overview of applications Background and literature review is valuable for anyone considering further research or application in energy statistics *ORNL-NSIC*, 1966 **Motion, Forces, and Energy** Michael J.
