**Charles Darwin's 'The Life of Erasmus Darwin'** Charles Darwin,2003 Charles Darwin s book about his grandfather The Life of Erasmus Darwin is curiously fascinating Before publication in 1879 it was shortened by 16% with several of the cuts directed at its most provocative parts The cutter with Charles s permission was his daughter Henrietta an example of the strong hidden hand of meek seeming Victorian women Originally published in 2003 this first unabridged edition edited by Desmond King Hele includes all that Charles originally intended the cuts being restored and printed in italics Erasmus Darwin was one of the leading intellectuals of the eighteenth century He was a respected physician a well known poet a keen mechanical inventor and a founding member of the influential Lunar Society He also possessed an amazing insight into the many branches of physical and biological science Most notably he adopted what we now call biological evolution as his theory of life 65 years prior to Charles Darwin s Origin of Species

**The Life and Letters of Charles Darwin** Charles Darwin,1972 **The Autobiography of Charles Darwin** Ed. Francis Darwin,2023-10-01 One little event during this year has fixed itself very firmly in my mind and I hope that it has done so from my conscience having been afterwards sorely troubled by it it is curious as showing that apparently I was

interested at this early age in the variability of plants With respect to science I continued collecting minerals with much zeal I must have observed insects with some little care I almost made up my mind to begin collecting all the insects which I could find dead for on consulting my sister I concluded that it was not right to kill insects for the sake of making a collection Life there was perfectly free the country was very pleasant for walking or riding and in the evening there was much very agreeable conversation not so personal as it generally is in large family parties together with music Nothing has left a more vivid picture on my mind than these evenings at Maer from this book Autobiography of Charles Robert Darwin 12 February 1809 19 April 1882 was an English naturalist and geologist best known for his contributions to evolutionary theory He established that all species of life have descended over time from common ancestors This has been edited by his son Francis Darwin Selected Stories of Honor de Balzac by Honor de Balzac In this collection Honor de Balzac presents a selection of his acclaimed short stories showcasing his incredible talent for vivid storytelling and character development With its rich language and engaging narratives this book is a must read for fans of classical literature Key Aspects of the Book Selected Stories of Honor de Balzac Collection of Short Stories The book features a collection of acclaimed short stories by Honor de Balzac Vivid Storytelling and Character Development The stories showcase Balzac s incredible talent for vivid storytelling and character development Useful for Literature Enthusiasts The book is useful for fans of classical literature and those interested in the works of Balzac Honor de Balzac was a French novelist and playwright who is regarded as one of the greatest writers of Western literature His book Selected Stories of Honor de Balzac is highly regarded for its captivating storytelling and rich language **The Works of Charles Darwin, Volume 10** Charles Darwin,1987-11 Charles Robert Darwin 1809 1882 has been widely recognized since his own time as one of the most influential writers in the history of Western thought His books were widely read by specialists and the general public and his influence had been extended by almost continuous public debate over the past 150 years New York University Press s new paperback edition makes it possible to review Darwin s public literary output as a whole plus his scientific journal articles his private notebooks and his correspondence This is complete edition contains all of Darwin s published books featuring definitive texts recording original pagination with Darwin s indexes retained The set also features a general introduction and index and introductions to each volume **Naturally Selected** Charles Darwin,2017-08-24 New edition of Charles Darwin s life told in his own words The autobiography has been slightly edited and contains a brief Foreword by Professor David Christopher Lane Ph D Fascinating glimpse into Darwin s life and work [Charles Darwin](#) Charles Darwin,2015-01-07 Charles Darwin On the Origin of Species and Autobiography of Charles Darwin By Charles Darwin Author Francis Darwin Editor The origin of Species is perhaps the most important for biology scientific work and one of the fundamental work in the history of science created by British naturalist Charles Darwin published in English in 1859 Exposing his theory that organisms evolve by natural selection Darwin presented as proof of data collected during the voyage with the ship Beagle The book is considered the most and

most unbeatable large scale theoretical work in the history of the science of life and rightly comparison between him and biological treatises of Aristotle and its impact on the knowledge of man about himself and the world and intellectual revolution caused by it are evaluated as larger than those of the books of Newton Copernicus and the great physicists of modern times The scientific work of Darwin completely changed the way we people perceive Not a religious or philosophical revelation and scientific work looking for the answer to one question where we came people Man is like a link in a long evolutionary chain looked down upon and challenged while remaining classic and intriguing today The origin of Species was the main work in the life of Darwin For contemporaries this is the book capsized the world but only in recent decades began to be assessed as significant and true theorists of biology Every intelligent and understanding the pleasure of reading a person must have this book and to add it as part of his collection in the library The opportunity to enjoy this scientific work created by this brilliant scientist naturalist and to find the fountain of life with him is more than unique Born on 12 February in 1809 in the family of Dr Robert and Susannah Darwin Studying medicine at the Medical School of Edinburgh Scotland in 1825 in later to be recorded in the student circle of Natural History During the work it does two small discoveries in the life of leeches as larvae The head of the circle Professor Grant is interested in his report on this subject and is mentioned in one of its publications for the discovery of his student Two years later Darwin interrupted his studies and applied theology at Cambridge At that time fascinated by entomology and botany and collected a large collection of beetles inhabiting the mansion of his uncle Soon a new passion rewarded as famous entomologist John Stevens published a book about British insects and describing some rare beetle author added one sentence Caught by Charles Darwin At university Darwin met with Professor Henslow which helps absorption of the methodology for collecting and identifying plants and animals On his advice is included in the expedition of Professor Sedgwick in the Welsh mountains in August immediately after his graduation in 1831 with a degree in geology In December again with the assistance of Hounslow is included in the crew Beagle which travels on a world tour to map coasts in the Southern Hemisphere but naturalist After returning to Darwin issued several books that describe his research during the journey and began to work on the theory of evolution which was issued on November 24 1859 In 1868 he published his second work The variation of Animals and Plant under Domestification Darwin published a number of papers in biology also establishes and biogenic origin of the soil Died 73 years ago in the village of Downey England

**The Autobiography of Charles Darwin (Dodo Press)** Charles Darwin, 2007-08 Charles Robert Darwin 1809 1882 was an English naturalist who achieved lasting fame by producing considerable evidence that species originated through evolutionary change at the same time proposing the scientific theory that natural selection is the mechanism by which such change occurs This theory is now considered a cornerstone of biology and has significantly affected other disciplines such as philosophy psychology and anthropology

*The Life and Letters of Charles Darwin Including an Autobiographical Chapter* Edi Charles Darwin, 2012-06-25 Charles Robert Darwin FRS 12 February 1809 19

April 1882 was an English naturalist He established that all species of life have descended over time from common ancestors and proposed the scientific theory that this branching pattern of evolution resulted from a process that he called natural selection Darwin published his theory with compelling evidence for evolution in his 1859 book On the Origin of Species overcoming scientific rejection of earlier concepts of transmutation of species By the 1870s the scientific community and much of the general public had accepted evolution as a fact However many favoured competing explanations and it was not until the emergence of the modern evolutionary synthesis from the 1930s to the 1950s that a broad consensus developed in which natural selection was the basic mechanism of evolution In modified form Darwin s scientific discovery is the unifying theory of the life sciences explaining the diversity of life wikipedia

**Charles Darwin: His Life in an Autobiographical Chapter (annotated)** Charles Darwin, 2015-11-26 Charles Robert Darwin was the second son of Dr Robert Waring Darwin of Shrewsbury where he was born on February 12 1809 Dr Darwin was a son of Erasmus Darwin sometimes described as a poet but more deservedly known as physician and naturalist Charles Darwin s mother was Susannah daughter of Josiah Wedgwood the well known potter of Etruria in Staffordshire

**On the Origin of Species Charles Darwin** Charles Darwin, 2016-12-10 On the Origin of Species or more completely On the Origin of Species by Means of Natural Selection or the Preservation of Favoured Races in the Struggle for Life published on 24 November 1859 is a work of scientific literature by Charles Darwin which is considered to be the foundation of evolutionary biology Darwin s book introduced the scientific theory that populations evolve over the course of generations through a process of natural selection It presented a body of evidence that the diversity of life arose by common descent through a branching pattern of evolution Darwin included evidence that he had gathered on the Beagle expedition in the 1830s and his subsequent findings from research correspondence and experimentation
