*Militarism and the Terrain of Memory* John Bechtold, 2024-08-01 This book analyzes how the Iraqi city of Fallujah became registered as a setting for military heroics in American memory In 2004 the U S military conducted two disastrous assaults in Fallujah Iraq More than 1 000 citizens were killed and according to the military s own estimate upwards of 200 000 people were displaced because of the violence Yet despite this human catastrophe the kind of information that emerged in the public domain during the battle foregrounded the soldier s experience in war while effacing the destruction of Iraqi bodies This tendency to foreground the soldier body is a direct result of the military s intervention in what they conceptualize as the information environment This book draws from the second assault in Fallujah as a case study to explicate the military s investment in this perspectival space which is a consequence both of the mediatization of contemporary war and of the need to influence knowledge considered unfavorable to military operations In short the military enlists the media in their targeting process to produce information that is then deployed as persuasive force to modify the beliefs of specific target populations

When the cultural texts produced by the media are remediated in the public domain after war they can be thought of as martial constructs because they originated during war through the military's systemized attempt to influence knowledge. That is, these texts trace to a specific battlefield objective. This book reframes the notion of propaganda as a generalized public relations strategy into a more acute and coordinated attempt to decontextualize specific knowledge in the information environment. This book will be of much interest to students of media and communication studies, war studies, memory studies, and international relations.

Social TV Cory Barker, 2022-06-27 Winner of the 2023 SCMS Media Industries Scholarly Interest Group Outstanding Book Award sponsored by the Center for Entertainment Media Industries. On March 15, 2011, Donald Trump changed television forever. The Comedy Central Roast of Trump was the first major live broadcast to place a hashtag in the corner of the screen to encourage real-time reactions on Twitter, generating more than 25,000 tweets and making the broadcast the most watched Roast in Comedy Central history. The Trump Roast initiative personified the media and tech industries' utopian vision for a multi-screen and communal live TV experience. In *Social TV: Multi-Screen Content and Ephemeral Culture*, author Cory Barker reveals how the US television industry promised but failed to deliver a social media revolution in the 2010s to combat the imminent threat of on-demand streaming video. Barker examines the rise and fall of Social TV across press coverage, corporate documents, and an array of digital ephemera. He demonstrates that despite the talk of disruption, the movement merely aimed to exploit social media to reinforce the value of live TV in the modern attention economy. Case studies from broadcast networks to tech start-ups uncover a persistent focus on community that aimed to monetize consumer behavior in a transitional industry period. To trace these unfulfilled promises and flopped ideas, Barker draws upon a unique mix of personal Social TV experiences and curated archives of material that were intentionally marginalized amid pivots to the next big thing. Yet, in placing this now-forgotten material in recent historical context, Social TV shows how the era altered how the industry pursues audiences. Multi-screen campaigns have shifted away from a focus on live TV and toward all-day content streams. The legacy of Social TV then is the further embedding of media and promotional material onto every screen and into every moment of life.

*A New Approach to Reading Videogames as Story* Thomas Rowland, 2026-01-27 This book introduces a new methodology for understanding videogames with particular attention to three types of videogames: toy games, storybook games, and ludonarratives. This methodology pulls from phenomenological and deconstructionist roots informed by medieval studies and the history of reading to emphasize how important playing stories can be as a form of narrative. This book explores the idea of storyplaying in connection with new ideas on intramersive movement, game mechanics, and sacred play to develop a typology of videogames that will enable critics, educators, and theorists to situate videogames within a broad continuum of literary history. Building on this foundation, this book continues by exploring additional facets of this methodology by exploring the relationship between videogames and film criticism, the emerging art world of game-mediated photography, the various economies constructed around videogames, the potential of

games to serve as third places and some suggestions for videogames in the classroom These ideas are contextualized by the author's argument that videogames serve a purpose akin to the original function of medieval cathedrals as intentional virtual spaces with dedicated and important meditation which given today's decadent cultural and political climate underscores the urgency of recognizing videogames as being vital to our scholarly and educational enterprises **Deep Comprehension**
