## Science Fiction and Narrative Form

**Science Fiction and Narrative Form** David Roberts, Andrew Milner, Peter Murphy, 2023-02-23. Establishing science fiction as its own distinct and increasingly important narrative form, this book explores how the genre challenges pervasive perceptions of society as they appear in the conventional modern novel. Inspired by and building upon Georg Lukács's criticism of the orthodox novel for its depiction of life as alienating and disjointed, Milner, Murphy, and Roberts demonstrate that science fiction steps beyond this contemporary form to be a more constructive form of literature one able to conceive of society as complete, integrated, and well rounded. Taking stock of three kinds of science fiction which lie outside the scope of the modern novel—theological, ontological, science fiction of future history, and epic science fiction, this book demonstrates the genre's unique capacity to encapsulate the whole world—persons and events, things and objects—in a glance and address the motive behind the longing for meaningful totality. With reference to a vast array of works by authors such as Michel Houellebecq, Elias Canetti, Isaac Asimov, Jules Verne, H. G. Wells, Aldous Huxley, Marge Piercy, Iain M. Banks, Margaret Atwood, Ursula K. Le Guin, William Gibson, Dirk C. Fleck, Philip K. Dick, George Orwell, and Kazuo Ishiguro, this book offers a compelling argument for rethinking the position and potential of the science fiction novel and to challenge the way we perceive our culture.

**Science Fiction Rise** Serena Vaughn, AI, 2025-05-05. *Science Fiction Rise* explores the surprising and powerful

connection between science fiction narratives and real world technological innovation. It examines how science fiction has not only predicted future technologies but has also actively influenced their development. The book highlights how our collective imagination, spurred by sci-fi, acts as a key driver of technological advancement. For example, ideas first explored in science fiction like robotics and space exploration have demonstrably shaped scientific inquiry and funding priorities. The book argues that science fiction is more than just a reflection of technological trends; it's an active participant in shaping them. It acts as a kind of creative laboratory where concepts are tested and refined, ultimately influencing scientific research. The

book presents this information with historical and cultural context analyzing key science fiction works alongside actual technological breakthroughs. The book is structured into three sections starting with an introduction to the history and themes of science fiction. It then delves into specific case studies such as artificial intelligence and its portrayal in science fiction before concluding with a discussion of the ethical responsibilities of shaping the future through technology. This approach allows readers to understand both the historical impact and the potential future role of science fiction in innovation.

**Utopia and Dystopia in the Age of Trump** Barbara Brodman, James E. Doan, 2019-06-04. *Utopia and Dystopia in the Age of Trump*. Images from Literature and Visual Arts treats literature, film, television series, and comic books dealing with utopian and dystopian worlds reflecting on or anticipating our current age. From Henry James's dreamlike utopia of *The Great Good Place* to the psychotic world of Brett Easton Ellis's *American Psycho* from science fiction and recent horror films, television adaptations of books such as Margaret Atwood's *The Handmaid's Tale* and new series such as *Black Mirror* to the repressive Hitlerian dystopia of Katherine Burdekin's *Swastika Night* the contributors examine the development of scenarios that either prefigure the rise of individuals such as Donald J. Trump or suggest alternatives to them. Ultimately one might say of the worlds presented here viewed from different social and political perspectives one person's utopia is another's dystopia. This is the fifth in a series of books edited by Barbara Brodman and James E. Doan and published by Rowman Littlefield with Fairleigh Dickinson University Press. *The Universal Vampire*, *Origins and Evolution of a Legend* and *Images of the Modern Vampire*, *The Hip* and *the Atavistic*, both in 2013 focused on the vampire legend in traditional and modern thought. *The Supernatural*, *Revamped*, *From Timeworn Legends to Twenty First Century Chic*, 2016 examined a range of supernatural beings in literature, film, and other forms of popular culture. *Apocalyptic Chic*, *Visions of the Apocalypse* and *Post Apocalypse* in Literature and Visual Arts, 2017 dealt with legends and images of the apocalypse and post apocalypse in film and graphic arts, literature, and lore from early to modern times and from peoples and cultures around the world.

*Science Fiction and the Ethics of Artificial Wombs* Evie Kendal, 2025-12-11. In this revolutionary book, Evie Kendal explores the potential that ectogenesis has to promote sexual equality in human reproduction and the role science fiction plays in imagining its realisation.

**Blueprint**, 2007. **Capitalism in Octavia Butler's "Parable of the Sower". Utopia through Immanent Critique** Lena Danielmeyer, 2020-10-06. Seminar paper from the year 2020 in the subject English Language and Literature Studies Literature grade 1.0 University of Osnabrück language English abstract. This paper will argue that in *Parable of the Sower* by Octavia Butler creates utopian hope by realistically building a dystopian vision which immanently criticises the present. For reasons of brevity this will be elucidated mainly using the example of capitalism. While an abundance of other issues taken up by the novel like climate change, democracy, racism, or violence would certainly serve as productive foci of analysis as well, capitalism will be the centre of attention because it is at the core of the apocalyptic circumstances portrayed in the novel. It also constitutes an intersection with most of the other issues named above, making capitalism a suitable

starting point Firstly a short overview will be given on contemporary interpretations of the state of utopia pointing out capitalism as a main factor in the changing of utopianism Among others Krishan Kumar s The Ends of Utopia Jerry Phillips s Utopia and Catastrophe in Octavia Butler s Parable of the Sower and Darko Suvin s Metamorphoses of Science Fiction will be consulted Realism cognition and estrangement will be pointed out as main tools of offering immanent critique and in extension utopian hope Secondly the production of immanent critique in Parable of the Sower will be analysed with the help of Mathias Nilges s paper on The Realism of Speculation Mike Davis s City of Quartz will serve to illustrate the realism in Butler s vision of future Los Angeles The second example will examine the company town Olivar Briefly consulting Rottinghaus Pluretti s and Sutko s discursive paper The End of Material Scarcity the effectiveness of this immanent critique will be discussed Lastly this paper will seek to show how immanent critique allows for the creation of utopian hope pointing towards the transformative value of utopian literature presented in Carl Freedman s Critical Theory and Science Fiction This paper will because of its limited length not be able to further investigate critiques of capitalism in any other context than that of Butler s novel Also it will not be analysing the portrayal of capitalism as essentially nostalgic and conservative making it the opposite of the utopian vision of adaptation and progress that it is contrasted with This paper will not delve deeper into other interesting aspects of the generation of utopian hope like narration
