to a particular economic ideology built on the premise of exploitation and subjugation. The stories told in this volume tell against the orthodoxy the colonizer and the seemingly powerful. They are organized as stories of resistance, emancipation and transformation. They invite us to rethink the multiple ways to re structure power relations between the colonizer and the colonized and open up spaces for the marginalized underprivileged voices. Volume 4 is designed to create a new business storytelling paradigm that critically approaches business narratives that have historically privileged a corporate agenda. It explores the various ways that images of the other in business are developed, presented and accounted for through powerful and dominant narratives. The stories in this volume collectively help readers to understand, resist and provide strategies for change through various analyses of how business narratives come to develop, get written, are legitimized, are challenged and get changed over time. Volume 5 brings together the practices specific to the socioeconomic approach to management SEAM. SEAM is a method of change management developed through research interventions carried out in more than 2 000 companies and organizations since 1975. This method is systemic, it considers the whole company and tends to simultaneously increase social and economic performance by focusing mainly on the development of human skills and behaviors making it possible to reduce dysfunctions and recycle hidden costs into added value.
