The Forbidden Tree and the Jinn Serkan Zorba, 2023-05-10 Foremost among the most alluring mysteries and symbolisms of the Quran are the concepts of jinn the Forbidden Tree and the expulsion of Adam and Eve from paradise a k a the Fall of Adam or the Fall of Man Notwithstanding the importance of these concepts to the Islamic religion and culture and the ever mounting modern scientific know how the contemporary Muslim understanding of them is truth be told nebulous The legends of the Forbidden Tree and the Fall of Adam are central to the story of the creation of humanity s primogenitors not only in the Quran but also in the Bible However the meaning and significance of these stories have not yet been rationally elucidated Islamic scholars imams and the so called sheiks cannot shed much scholarly light to further our understanding of these topics as they almost never go beyond rehashing what is written in the traditional sources Likewise Judaic and Christian authorities have not advanced any rationally satisfactory explanations for these narrations In fact studying the contemporary Abrahamic religious cultural and self proclaimed scientific expositions on these subjects is an example of obscurum per obscurius This book presents two bold ideas pertaining to these topics which are complementary to one another 1 A novel interpretation of the Forbidden Tree and the Fall of Adam legends It deciphers the true meaning behind the Quranic and Biblical accounts of Adam and Eve eating from this forbidden tree exposing their private parts incurring the punishments of having to constantly struggle for survival and of being enemies with other living beings and shedding blood This interpretation also naturally resolves another age old enigma of God teaching Adam the names of all things 2 It shows that the concepts of jinn and devils do not refer to supernatural beings as traditionally assumed but rather to tangible beings that are all important for the biosphere and human health and wellbeing The interpretation that Dr Zorba has developed of these motifs is strictly based on a close reading of the Quran and the Hadith with the help of physics microbiology microbial ecology biogeochemistry and the fast emerging science of microbiota

Jackson,2002-02 A true workbook that requires students active participation Organized to match sections in the text for ease of use Global Biodiversity Brian Groombridge,Martin Jenkins,World Conservation Monitoring Centre,2000 This publication gives a broad ecological overview of current condition in the three main parts of the biosphere the seas the land and inland waters It also provides an historical context from the origin of life on the planet onward This has been done to demonstrate the long history of life on earth and to emphasise the brevity of human existence The first part of the book includes a discussion of the components of biodiversity and an account of the expansion of this diversity through geological time and the pattern of distribution on the planet The second part covers features of human impacts on the environment and the uses currently made of biodiversity The main lesson drawn is that while life itself has remarkable tenacity the tenure on earth of individual species has always been a strictly limited one The environment of any species has two main roles to provide the essential materials for growth and reproduction of the species and to remove or transform its waste products A failure of either of these two will have an adverse or catastrophic impact on the species concerned Ecosystems and the biosphere continue to function because the relentless pressure of natural selection has meant that organisms have evolved that thrive on the waste products of other organisms This is considered in the book to be the function of biological diversity A large number of tables and maps are presented in this publication including a table on biodiversity at country level This book has a companion volume Life Counts **A Summary of Biospheric Research 1975-1997** Ove Edlund,1999 **The Glass Ark** Linnea Gentry,Karen Liptak,1991 Describes the Biosphere 2 project which has created a closed environment intended to duplicate life on Earth in a way that would facilitate future space colonies **Textbooks from India: India and the world : a social science textbook for class VII** ,2003
