

TEN STEPS TO MINDFULNESS MEDITATION

1

Create time & space.
Choose a regular time each day for mindfulness meditation practice, ideally a quiet place free from distraction.

2

Set a timer.
Start with just 5 minutes and ease your way up to 15-40 minutes.

3

Find a comfortable sitting position.
Sit cross-legged on the floor, on the grass, or in a chair your feet flat on the ground.

4

Check your posture.
Sit up straight, hands in a comfortable position. Keep neck long, chin tilted slightly downward, tongue resting on roof of mouth. Relax shoulders. Close eyes or gaze downward 5-10 feet in front of you.

5

Take deep breaths.
Deep breathing helps settle the body and establish your presence in the space.

6

Direct attention to your breath.
Focus on a part of the body where the breath feels prominent: nostrils; back of throat; or diaphragm. Try not to switch focus.

7

Maintain attention to your breath.
As you inhale and exhale, focus on the breath. If attention wanders, return to the breath. Let go of thoughts, feelings or distractions.

8

Repeat steps 6-7.
For the duration of meditation session. The mind will wander. Simply acknowledge this and return to your breath.

9

Be kind to yourself.
Don't be upset if focus occasionally drifts or if you fall asleep. If very tired, meditate with eyes open and rearrange posture to more erect (but still relaxed) position.

10

Prepare for a soft landing.
When the timer goes off, keep eyes closed until you're ready to open them. Be thankful. Acknowledge your practice with gratitude.

Summary of Andy Puddicombe's The Headspace Guide to Meditation and Mindfulness Everest Media,2022-03-25T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The most common misconception about meditation is that it involves achieving a quiet empty mind through meditation which is a bubble in which there is nothing but space and through which nothing unpleasant can enter But meditation is actually about stopping thoughts and feelings 2 When you first sit down to meditate it can feel like you are caught in the middle of a traffic jam of thoughts But meditation does not make you think It simply shines a bright light on your mind so that you can see it more clearly 3 When we try to control everything we end up getting caught up in the rush hour traffic of our own minds

When we step back and observe the thoughts and feelings there is a sense of increased space It might feel as if we are simply an observer watching the thoughts and feelings go by 4 The thoughts that pop into your mind when you sit down to meditate or when you re walking down the street are autonomous You didn t bring them to mind and yet they came to mind You can t control your thoughts but you can control how you respond to them **Health Psychology** Linda Brannon,Jess Feist,2004

Backed by a strong and current research base Brannon and Feist s proven book offers balanced coverage of the cognitive behavioral and biological approaches to health psychology Adopters praise its even handed discussions of research and applications as well as the equal emphasis given to illness and prevention Integrated coverage of physiology including immunity pain and stress rounds out the text The authors include many innovative learning tools in every chapter to encourage active participation giving students the strategies and tools for behavior modification and critical thinking
